PROJECT: PIP-II_P2IT
CATEGORY: PIPING INSTRUMENTATION DIAGRAM

REV	REVISION CONTROL DOCUMENT	DATES	SIGNATURES
G	F10042546-G-RCD	12-Dec-2019	DRAWN R. Wang
		dd-Mmm-2019	APPROVED –

Notes

1. All pneumatic control valves will have an individual lockable valve on the air supply inlet to maintain valves in a safe position during U-tube insertion/removal.

2. All check valves in series with relief valves will have a 2mm hole drilled through bullet to avoid frequent opening of relief valves

3. In some cases a relief valve is shown on the bottom of a bayonet valve. These valves will be given the same number as the bayonet, but with the suffix "B". For example, the relief valve on bayonet MV-931-H will be tagged SV-931B-H.

4. In some cases a manual valve is shown on the top of a bayonet valve. These valves will be given the same number as the bayonet, but with the suffix "T". For example, the manual valve on bayonet MV-931-H will be tagged MV-931T-H. Any flanges on these valves are 1/4" female quick connect fittings.
