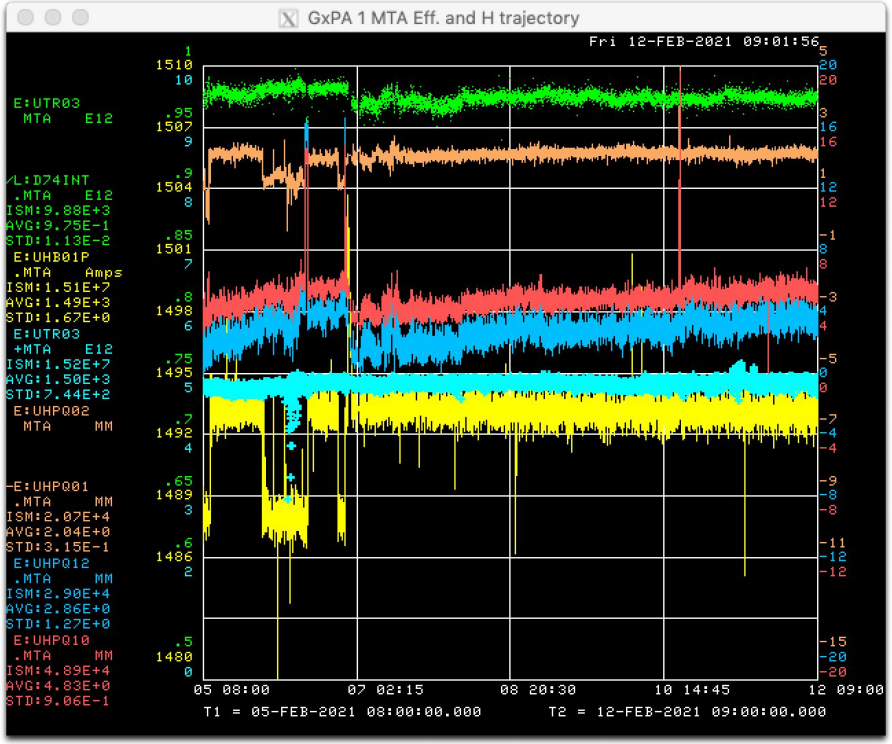
MTA: MeV Test Area

Jason St. John

Friday 9 O’Clock

2021 Feb 12

Beam History the past week



- >97% efficiency (E:UTR03/L:D74INT)
- ~4.8e12 protons per pulse

Learned to compensate with E:UHB01 setting for changes due to work on other beam lines, unusual timelines (including an MTA solo show!)

Fermilab
