

PHYSTAT-NU 2016

SEPTEMBER 19 – 21, 2016

Fermi National Accelerator Laboratory, Building 327

PhyStat-nu Fermilab 2016 is the second in a series of international workshops on statistical issues in experimental neutrino physics. The workshop will bring together statisticians and experimental physicists to address the challenges in designing future experiments and producing the most valuable results from running ones.

Scientific Organizing Committee

*Costas Andreopoulos, University of Liverpool
Daniel Cherdack, Colorado State University
Robert Cousins, University of California, Los Angeles
Kyle Cranmer, New York University
Mark Hartz, Kavli IPMU (WPI), University of Tokyo and TRIUMF
Alexander Himmel, FNAL
Thomas Junk (Chair), FNAL
Asher Kaboth, Royal Holloway, University of London and STFC, RAL
Louis Lyons, Imperial College London and University of Oxford
Gabriel Perdue, FNAL
Yoshi Uchida, Imperial College London
David van Dyk, Imperial College London
Elizabeth Worcester, BNL*

Local Organizing Committee

*Adam Aurisano, University of Cincinnati
Laura Fields, FNAL
Alexander Himmel, FNAL
Thomas Junk, FNAL
Keith Matera, FNAL
Gabriel Perdue, FNAL*
