

HEFT2015 - Higgs Effective Field Theory Workshop

Tuesday, 3 November 2015 - Friday, 6 November 2015

William Eckhardt Research Center, University of Chicago

Scientific Programme

Topics to be covered include (but are not limited to) EFT results for Higgs processes at the LHC and at future colliders, dark matter and flavour physics in an EFT approach, matching between EFT and UV physics, Higgs couplings fits, connection between effective operators and form factors, EFTs at NLO.

Space will also be reserved for open discussion.
