

Workshop on Microwave Cavity Design for Axion Detection

Tuesday, 25 August 2015 - Thursday, 27 August 2015

Livermore Valley Open Campus

Scientific Programme

This program is a work in progress.

We anticipate the first day will be used to bring researchers up to speed with general microwave cavity principles.

Days 2 & 3 will bring in subject matter experts on a variety of topics in accelerators, cavity construction and testing as well as have presentations for axion dark matter researchers on current R&D concepts and testing
