

Wesley J. Marshall has a master's degree in physics from Eastern Illinois University. Over the past 40 years, he has evaluated the hazards from hundreds of unique laser devices, published papers on analysis methods, and provided lectures and training courses for proper application of national and international laser safety standards. He is the author of Rockwell Laser Industries LAZAN Premium laser hazard analysis software. He serves the American National Standards Institute accredited committee Z136 and is chair of the technical subcommittee 7 on analysis and applications.
