

11th DOE LSO Workshop

Biographical Sketch for Geoff Cushman

Geoff Cushman is an optical test engineer working at NASA Ames Research Center under Jacobs Technologies in California. He received his Bachelor's degree in Physics and Astronomy from Whitman College in Walla Walla Washington. His current work focuses on the LEAF-Lite project which uses multiple 50-kW CW lasers to test various thermal protection materials for the Orion Spacecraft. Aside from anything physics and space related, Geoff also enjoys computer science and making life easier through automation and programming.
