

Anja Metz has worked as Research Safety Professional with the Division of Research Safety at the University of Illinois at Urbana-Champaign for three years. While the focus was on chemical safety during most of the time, she joined the radiation safety group earlier this year and took over the lead of the laser safety program. Research conducted for her M.S. in Bioengineering at the University of Illinois gave her the opportunity to work with laser systems. Before joining the University of Illinois, she worked as researcher and analytical chemist for the US Army Corps of Engineers in Champaign, IL and for the Bundeswehr Research Institute for Materials, Fuels and Lubricants in Germany. Anja earned an M.S. in Chemical Engineering in 1994 from the University of Essen in Germany.
