

Quick Reconstruction Update/Request

Mike Wallbank
28/7/2015

Blurred Clustering

- Gave an introduction to this clustering method at the LArSoft meeting on 19th May
- Have been developing this since and it has improved!
- Wrote a short note last week to describe the method: the implementation and the configuring
- Would be in DUNE docDB but can't work out how to add documents...

LArSoft Associations

- Now using the clustering to work on shower reconstruction
- As part of this, need associations with showers and hits, space points, tracks etc.
- All were present except tracks, so have modified the classes in `lardata/RawData/classes.h` to include shower and track associations
- Currently on branch `feature/wallbank_ShowerAssociations`
- Probably not breaking change... Shall I merge?
