OPOS is Here to Help You

Tuesday, 14 June 2016 17:00 (15 minutes)

The Offline Production Operation Service (OPOS) group of the Scientific Computing Division has been providing data production processing, specific processing campaigns, pre-staging, monitoring and monitoring infrastructure for different Intensity Frontier experiments at Fermilab.

OPOS is in constant communication with the experimenters transferring knowledge, debugging problems, developing tools and reporting failures. OPOS members are a bridge among experiments, they transfer successful strategies from one experiment to others.

Primary authors: Mr ALBA, Andres (intern); Mr FATTORUSO, Michele (Intern); Ms BUITRAGO, Paola (Intern); Mr PROPP, Tyler (Intern)

Co-authors: Dr MAZZACANE, Anna (Fermilab Employee); BENNEDETTO, Vito (Employee Fermilab)

Presenter: Mr PROPP, Tyler (North Central College)

Session Classification: Session 8
