

NOvA Operations Status

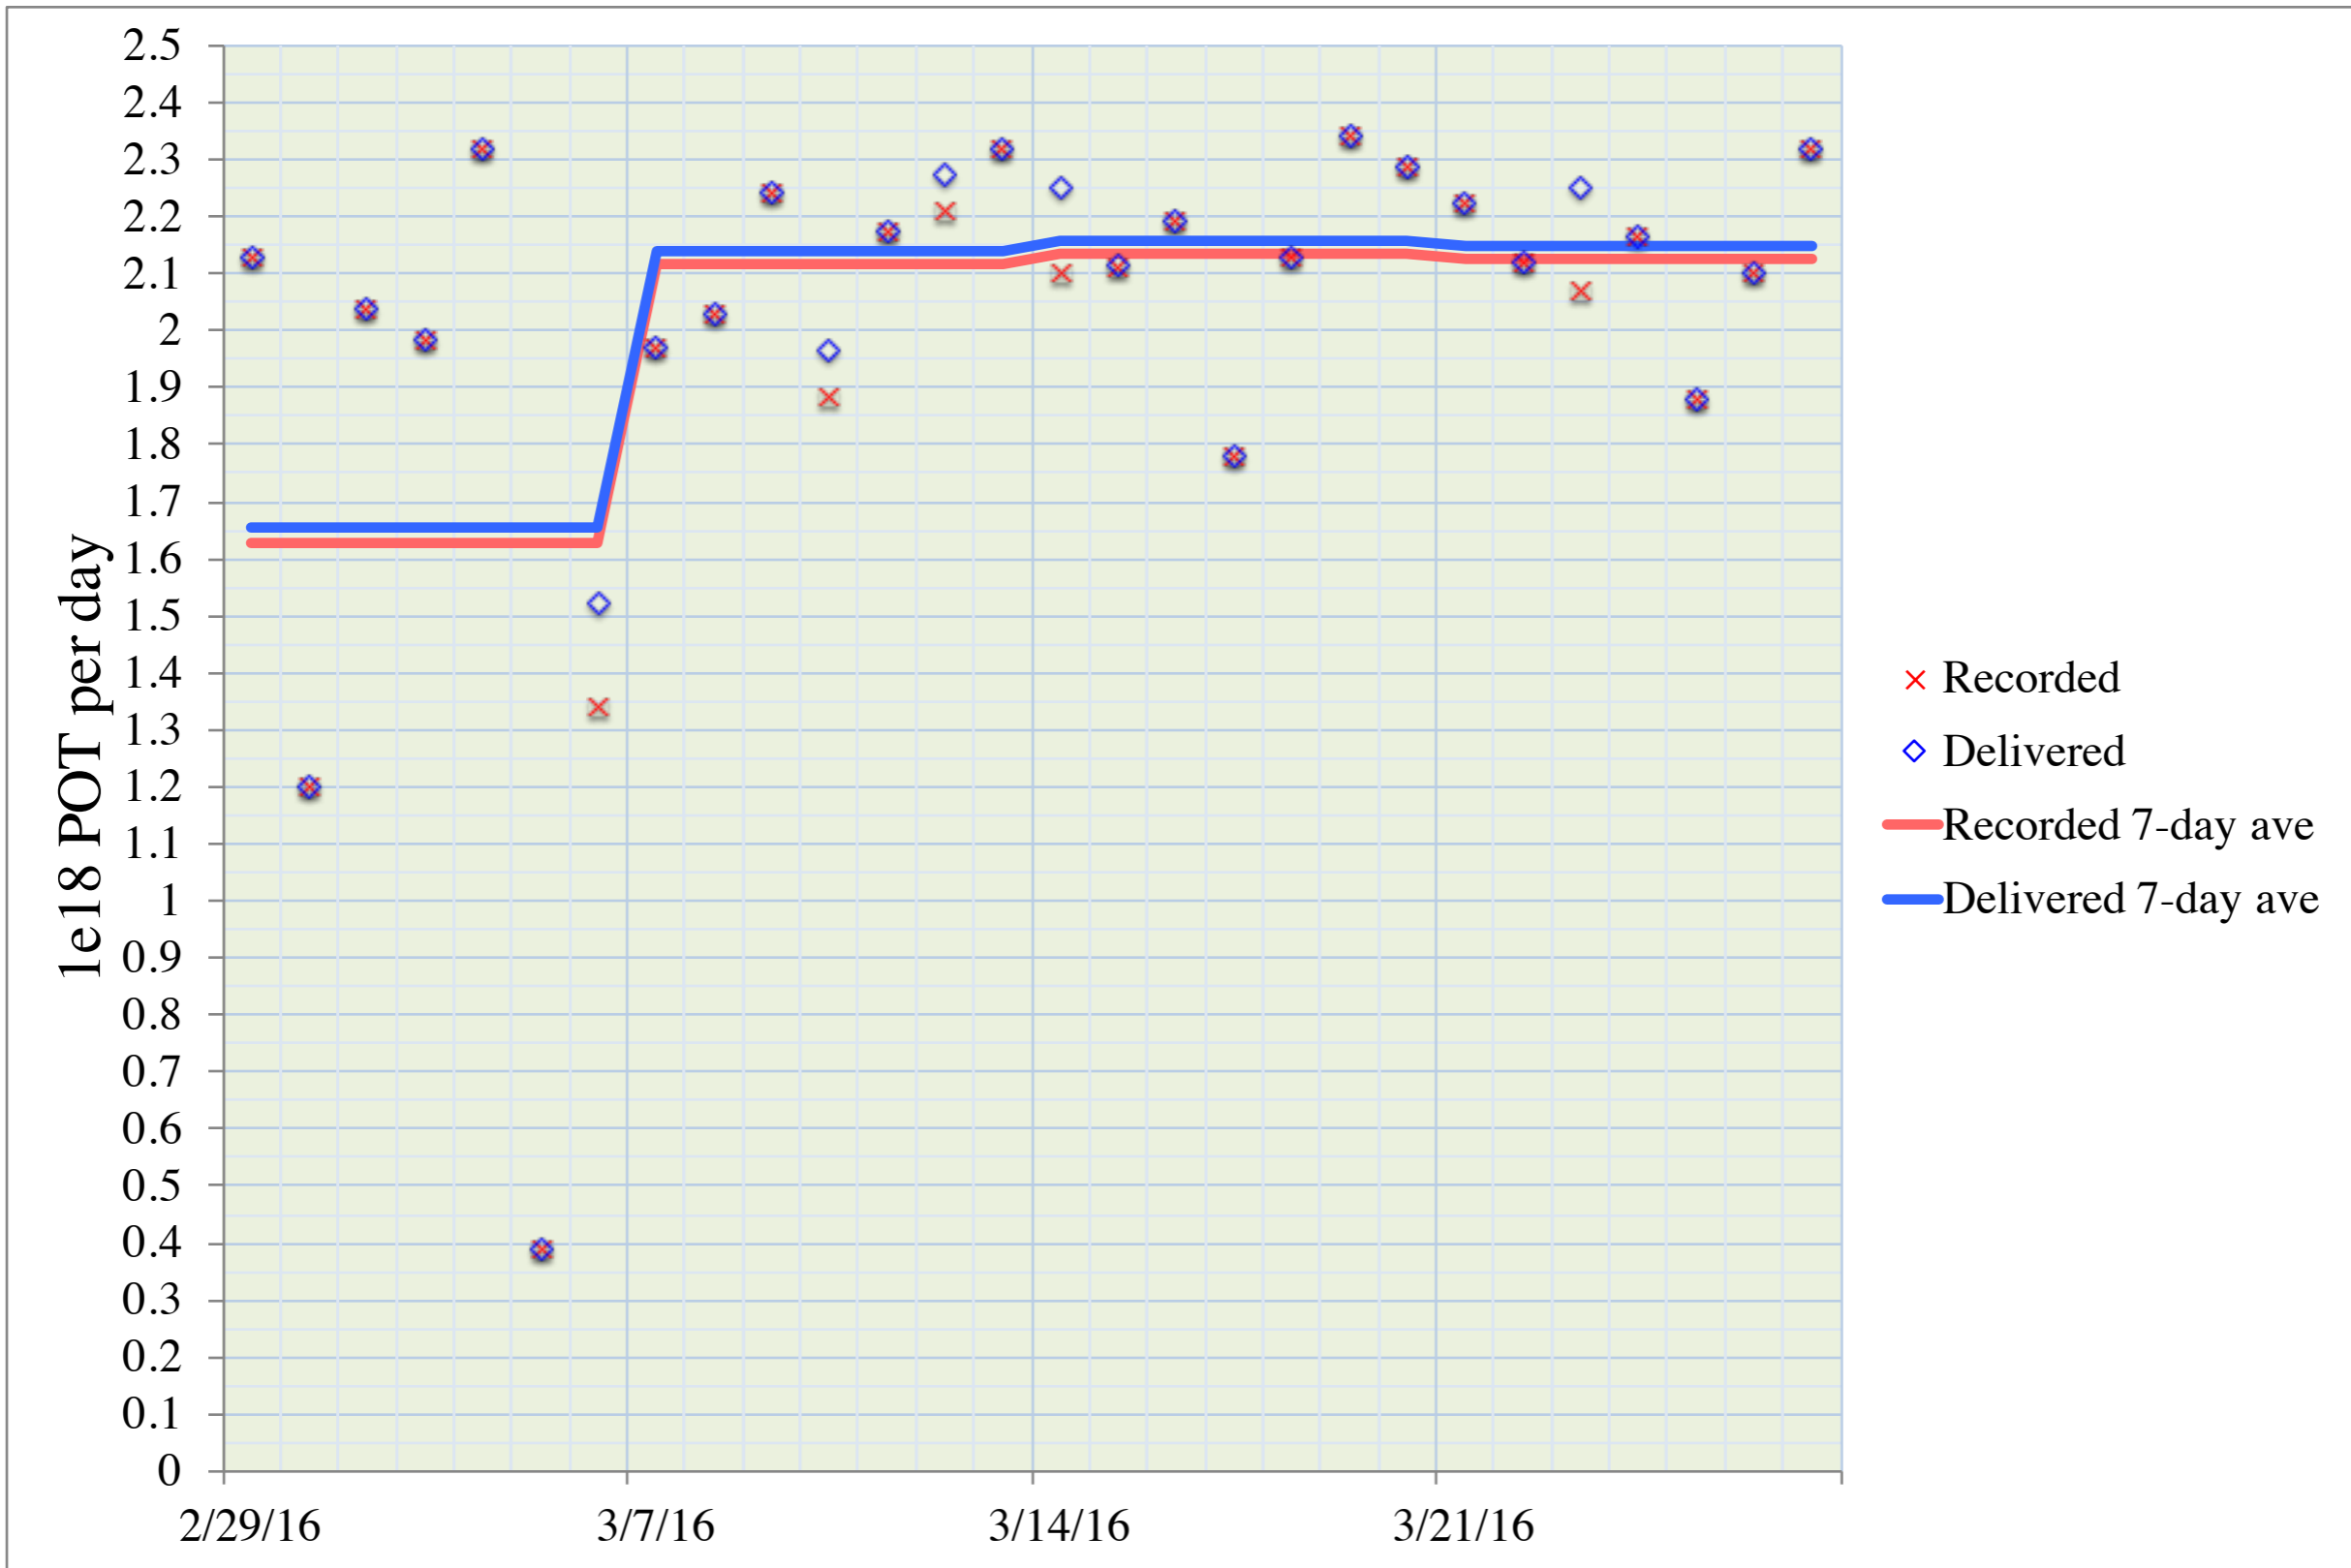

Evan Niner

3/28/16

Far Detector

- Smooth week, one crash resulting in 1 hour 50 minutes downtime. 98.8% uptime, 1.487e19 POT recorded.
- Lost communication with FD rack monitor Friday morning, restored with a reset at Ash River.

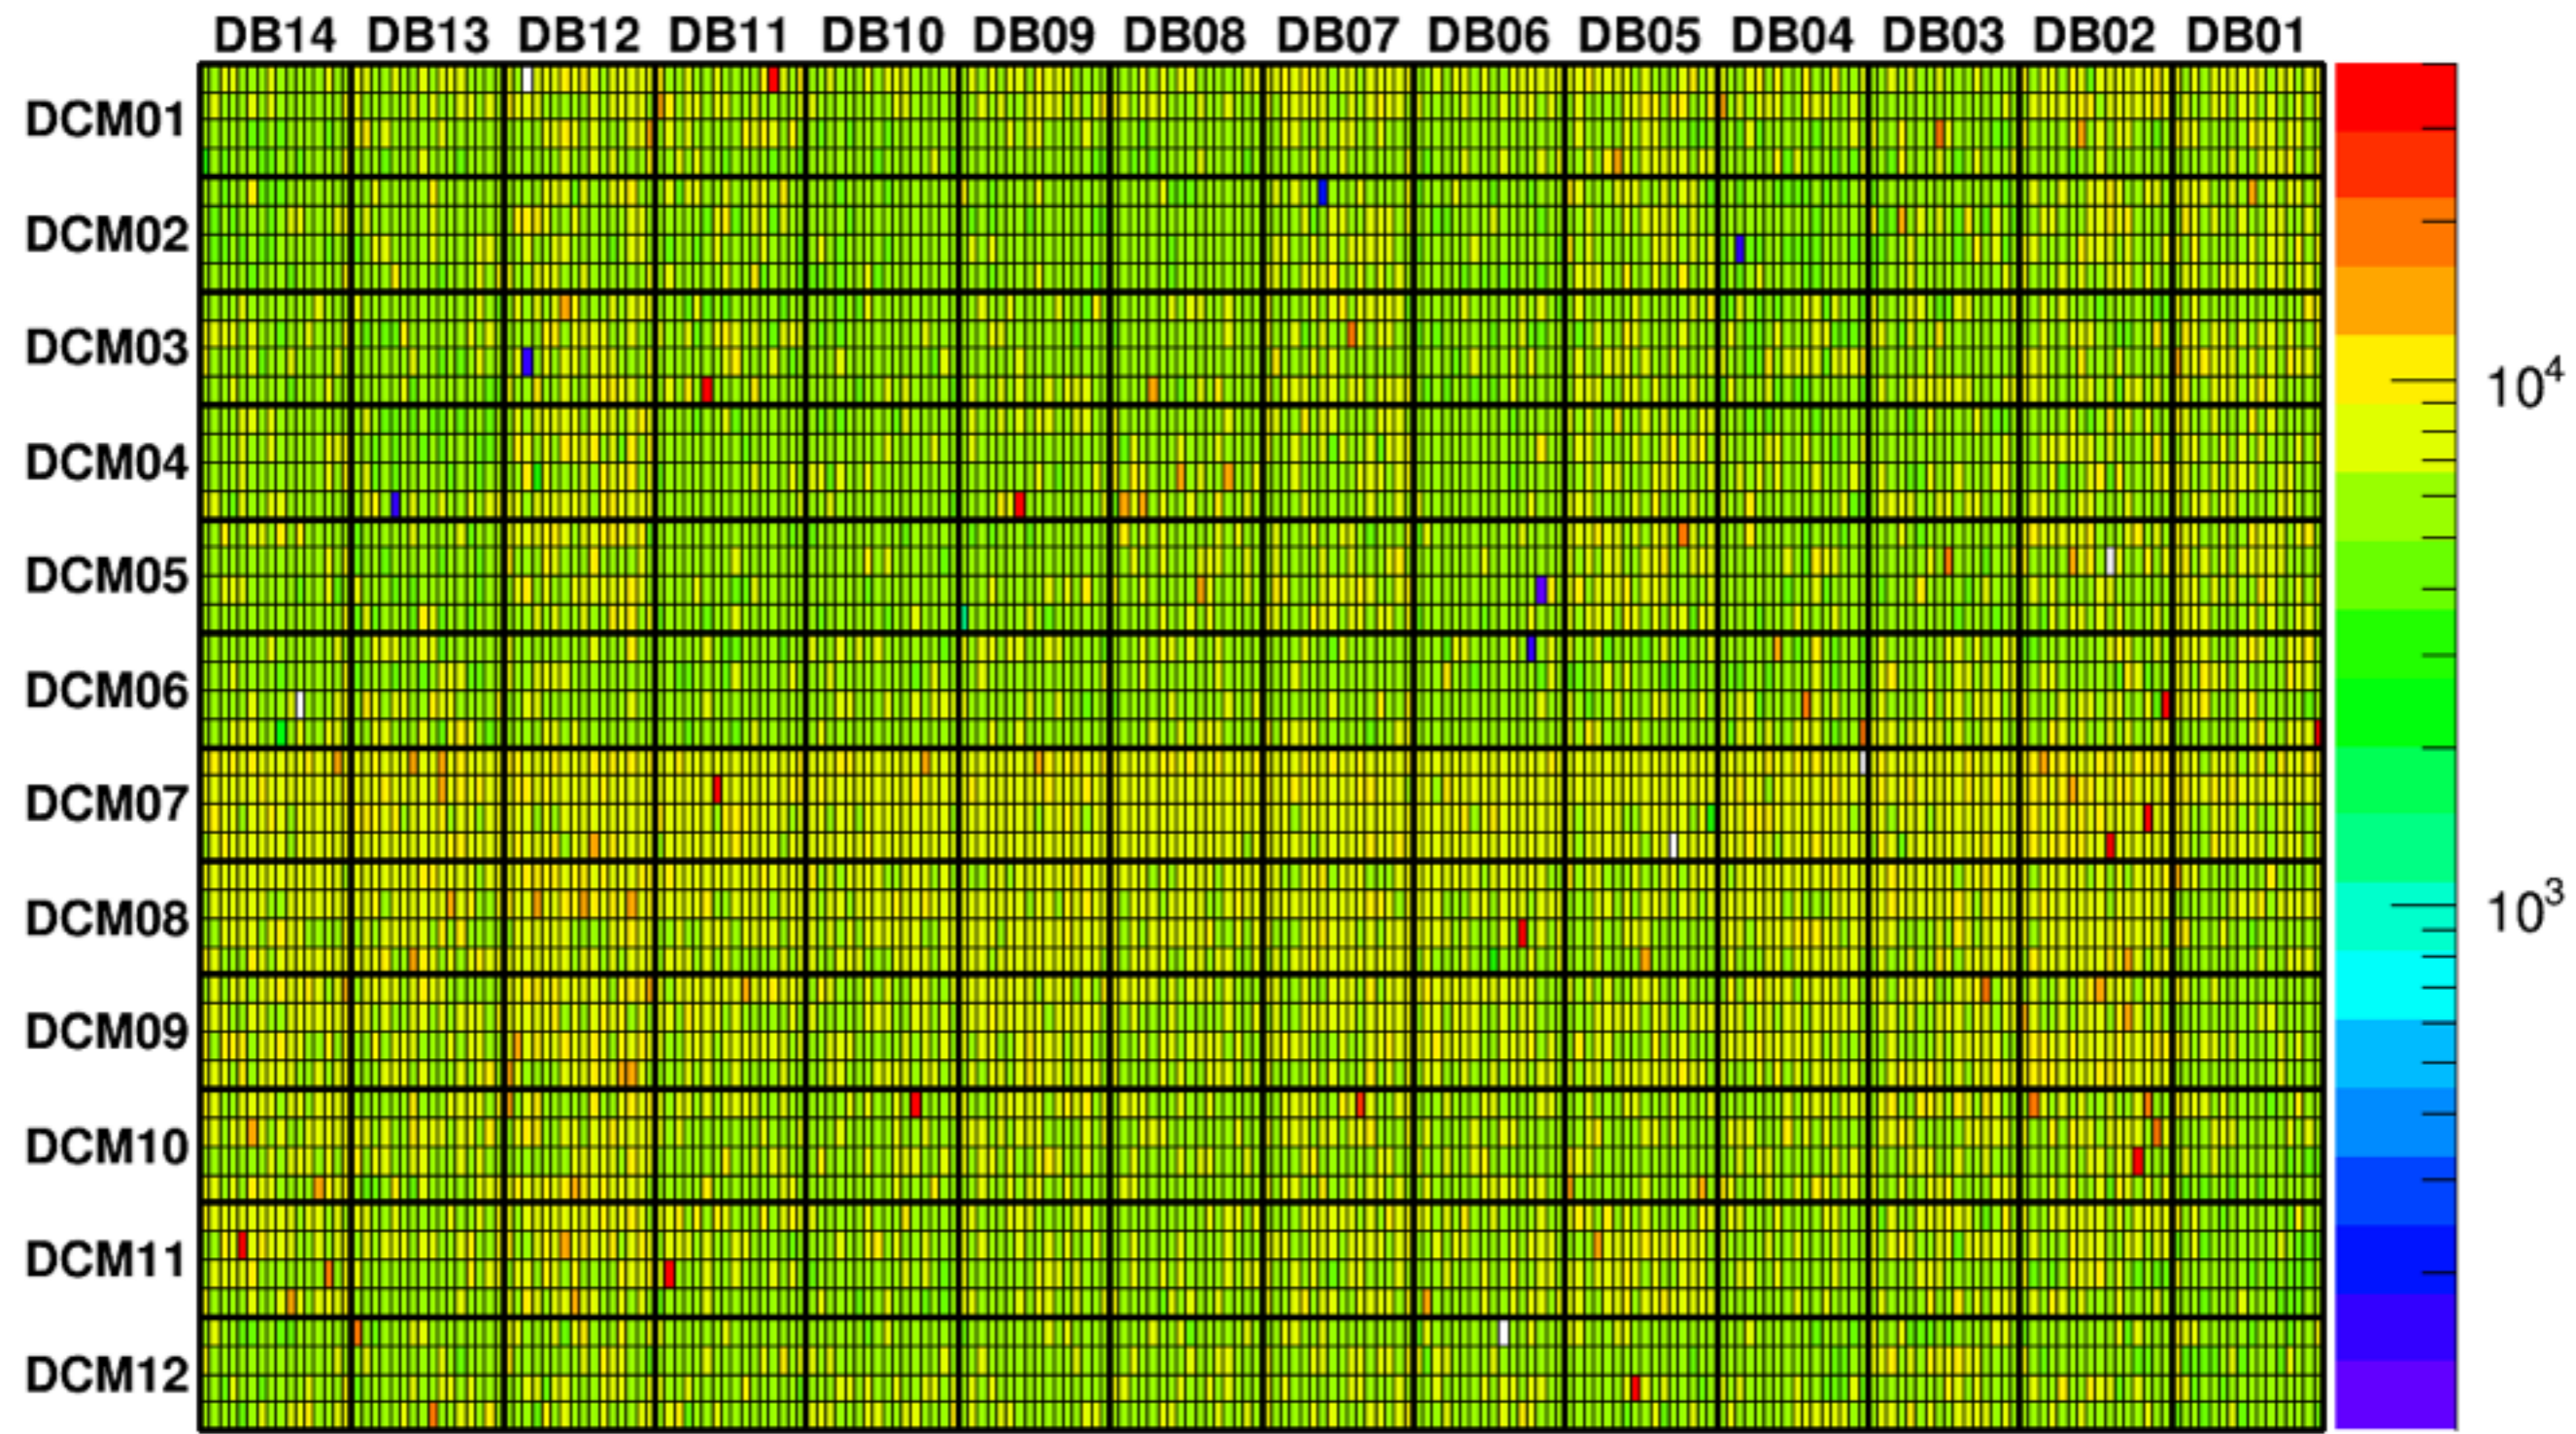

Near Detector

- Stable week, one DAQ crash
- Last Monday ND network reconfigured to restrict access on private/public networks. This uncovered the fact that the DCS manager node was not properly configured with a private network. This has been worked around and will be fixed permanently Wednesday.

Wednesday downtime plans

- On Wednesday, 3/30, the FD will be having annual HVAC maintenance
- Runs will be stopped at 8:30 am. Maintenance from 9 to 2. Detector will be recovered at 2, expect a run going by 3.
- Ash River will perform maintenance on 18 FEBs during this time.
