Reaching Out for Particle Physics

Monday, 31 July 2017 18:10 (1 minute)

The International Particle Physics Outreach Group (IPPOG) is a global network of physicists and educators committed to promote the particle physics research in the community through informal education and outreach. Following the model of experimental particle physics collaborations, IPPOG itself has become a scientific collaboration based on a memorandum of understanding. We describe the collaboration and its work to share ideas and best practices for reaching both scientist enthusiasts and audiences new to science.

Primary author: BARDEEN, Marjorie (FNAL)

Co-authors: Dr BECK, Hans Peter (University of Bern); Dr GOLDFARB, Steve (University of Melbourne)

Presenter: BARDEEN, Marjorie (FNAL)

Session Classification: Poster Session and Reception

Track Classification: Diversity, Education and Outreach
