Recent results of charmed baryon decays at Belle

Tuesday, 1 August 2017 13:30 (18 minutes)

We report the recent results of charmed baryon decays, based on the data collected by the Belle experiment at the KEKB collider. This includes the studies of $\Lambda_{c^+} \rightarrow \phi p \pi^0$, $\Lambda_{c^+} \rightarrow \pi^+ K^- p \pi^0$ and $\Lambda_{c^+} \rightarrow \pi^- K^+ p$ decays.
