## Jet Calibration in the ATLAS Experiment

*Wednesday, 2 August 2017 14:57 (18 minutes)*

The proper reconstruction and calibration of jets in ATLAS is crucial for many analyses performing precise measurements or searches for new physics. This talk reviews the derivation of the jet energy scale using 36.1 fb<sup>-1</sup> of data collected at a center-of-mass energy of 13 TeV over 2015 and 2016, as well as recent developments in jet reconstruction and calibration.
