Mu2e Diversity and Inclusion Task Force

Thursday, 3 August 2017 14:12 (12 minutes)

A Diversity and Inclusion Task Force for the Mu2e Experiment was formed in January of 2017. The charge was to “determine how Mu2e can effectively promote and develop diversity and inclusion within the experiment” with the goal of presenting a set of recommendations to the experiment at the June, 2017 Collaboration Meeting. In this work the Task Force defined “diversity and inclusion” within the context of Mu2e, gathered opinions from inside and outside of the experiment, and conducted a survey of collaboration members. In this talk we will present our findings, including a set of best practices that we assembled from other experiments and institutions.
