

MicroBooNE Update

Libo Jiang

All Experimenters' Meeting 06/13/2016

June 13, 2016

DAQ Uptime

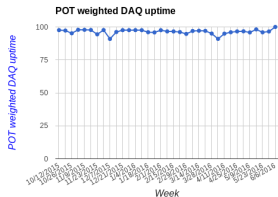

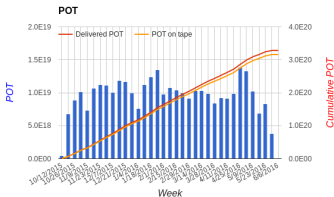

DAQ Uptime (Hourly, Past Week, left) and DAQ Uptime (Daily, Past Week, right)

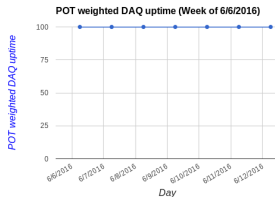

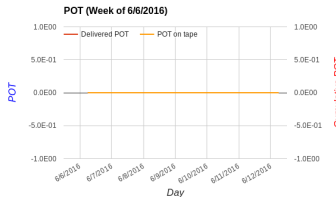

- Generally good, still no BNB beam, just taking cosmics at 5Hz
- Dips for tests, PMT calibrations, etc.

POT Delivered & Recorded(June6-June12)

Draw POT on tape

Week of	POT delivered (1e16)	POT on tape (1e16)
6/6/2016	0	0

- no pot delivered from June 3rd because the horn power supply was ground-faulted; still being diagnosed.

The BNB horn ground fault has not been isolated yet.

- Still being diagnosed.
- They tried inserting a borescope to look at the horn.

Purity Monitor Replacement

- The purity monitors were turned off last Thursday.
- They are replaced with measurements with cosmic muons.
