

One day software tutorial!

Quick Intro

David Martinez - Illinois Institute of Technology

Denver Whittington - Indiana University

Young DUNE

Fermilab

September 16th 2016

What is the goal for today!

- First → Interact with our tutorial leaders and invited presenters!
- Show you the basic steps to simulate and reconstruct events, creating and analyzing events using a ROOT tree, running an event display, compiling and modifying the dune2pc software.

What we wait from you!

- First of all : Enjoy this Friday! Remember this will be a low pressure work environment! Feel free to ask all the questions that you have to our invited presenters and tutorial leaders!
- We would like that at the end of the day you are able to do your first histogram!
- If all runs smoothly we will be really glad if you are able to share with us what you have been done today in the last session called "SHOW YOUR PLOT"

Let's begin our
tutorial!
