

10th International Neutrino Summer School Aug 7 - 18, 2017

<https://indico.fnal.gov/event/INSS2017>

For the past nine years, the International Neutrino Summer School has convened at locations around the world to provide training for the next generation of neutrino physicists in both theory and experiment. The school brings together graduate students and post docs, along with some of the best teachers and researchers in neutrino physics, to create an intense, two-week long learning experience in an open and interactive environment that covers the full range of modern neutrino physics.

Local Organizers

Jonathan Paley
Jen Raaf
Anne Schukraft
Erica Snider

International Advisory Committee

Steve Manly (University of Rochester, USA)
Manfred Lindner (Max Planck Inst. for Nuclear Physics, Heidelberg, Germany)
Seon-Hee Seo (Seoul National University, Seoul, Korea)
Caren Hagner (Hamburg University, Hamburg, Germany)
Ricardo Gomes (Federal University of Goias, Brazil)
Jun Cao (Institute of High Energy Physics, China)
Subir Sarkar (Oxford University, UK)
Masayuki Nakahata (Kavli IPMU, University of Tokyo, ICRR, Japan)
