2017 IOTA/FAST COLLABORATION MEETING

Tuesday, 6 June 2017 - Tuesday, 6 June 2017

OTE (IARC)

Book of Abstracts

Contents

TOUR IOTA FAST Facility 1

Director's Welcome and Group Photo 1

Introduction- IOTA/FAST Facility Plan, Timeline and Meeting Goals 1

Neural network reinforcement learning control studies 1

Wakefield study for superconducting accelerator cavities at FAST Facility 1

Simulation of Nonlinear Decoherence with Space 1

Talk by Lisa Lopez 1

Simulation of Nonlinear Integrable Optics in IOTA using IMPACT-Z 2

300MeV experiments: ICS, Xtal radiation, single photon etc. collaboration subjects . . . 2

Collaboration subjects 2

Discussion: Tentative plan for FAST experiments in 2017 IOTA/FAST tur and lunch break 2

Synergia simulations on the impact of space charge on nonlinear decoherence in the IOTA ring 2

Synergia simulations on the impact of space charge on nonlinear decoherence in the IOTA ring 2

New RCS design with IO 2

New RCS design with IO 3

Non-linear optics in UMER: theory, simulations, experiements 3

Discussion: Issues and challenges of NL optics experiments in IOTA 3

Coffee break 3

IOTA Electron Lens: nonlinear optics, cooling, and space-charge compensation 3

OSC progress 3

Coherent instabilities in integrable optics 3

Discussion: Issues and challenges of experiments in IOTA 3

Closeout 4

Discussion: Tentative plan for FAST experiments in 2017 4

IOTA/FAST tour and lunch break 4

NML Tour 4

No Host Lunch - Following NML tour you are welcome to take a short walk or ride the shuttle to Wilson Hall Cafeteria. The Cafeteria offers a wide variety of menu options. 4

Board Shuttle to IARC 4

Group Photo and Board Shuttle to NML 4

Board Shuttle to Wilson Hall 5

The neural network reinforcement learning control studies at FAST 5

Results of the CC2 transverse matrix measurements in 2016 and 2017 plans 5

Wakefield study for superconducting accelerator cavities at FAST Facility 5

Linac commissioning 5

Ring and p+ injector status 5

IOTA optics and NL magnet 5

Opening Welcome 5

4

TOUR IOTA FAST Facility

Shuttle to New Muon Lab (NML)

9

Director's Welcome and Group Photo

10

Introduction- IOTA/FAST Facility Plan, Timeline and Meeting Goals

Vladimir will give a brief Introduction of the IOTA/FAST Facility Plan and Review the Timeline and Goals of the meeting.

21

Neural network reinforcement learning control studies

22

Wakefield study for superconducting accelerator cavities at FAST Facility

23

Simulation of Nonlinear Decoherence with Space

25

Talk by Lisa Lopez

26

Simulation of Nonlinear Integrable Optics in IOTA using IMPACT-Z

27

300MeV experiments: ICS, Xtal radiation, single photon etc. collaboration subjects

28

Collaboration subjects

29

Discussion: Tentative plan for FAST experiments in 2017 IOTA/FAST tur and lunch break

30

Synergia simulations on the impact of space charge on nonlinear decoherence in the IOTA ring

31

Synergia simulations on the impact of space charge on nonlinear decoherence in the IOTA ring

32

New RCS design with IO

33

New RCS design with IO

34

Non-linear optics in UMER: theory, simulations, experiements

35

Discussion: Issues and challenges of NL optics experiments in IOTA

36

Coffee break

37

IOTA Electron Lens: nonlinear optics, cooling, and space-charge compensation

38

OSC progress

39

Coherent instabilities in integrable optics

40

Discussion: Issues and challenges of experiments in IOTA

41

Closeout

42

Discussion: Tentative plan for FAST experiments in 2017

43

IOTA/FAST tour and lunch break

44

NML Tour

45

No Host Lunch - Following NML tour you are welcome to take a short walk or ride the shuttle to Wilson Hall Cafeteria. The Cafeteria offers a wide variety of menu options.

46

Board Shuttle to IARC

47

Group Photo and Board Shuttle to NML

48

Board Shuttle to Wilson Hall

49

The neural network reinforcement learning control studies at FAST

50

Results of the CC2 transverse matrix measurements in 2016 and 2017 plans

51

Wakefield study for superconducting accelerator cavities at FAST Facility

52

Linac commissioning

53

Ring and p+ injector status

54

IOTA optics and NL magnet

55

Opening Welcome
