

Vth IOTA/FAST Annual Meeting/Workshop: **Closeout**

**Message from Lisa : “remind everyone to drop
off their name badges on their way out.”**

That was very successful *WORKshop*:

- 17 talks
- Discussions
- Tour

Many thanks to all the speakers!

Thanks to all participants!

Special thanks to sessions' conveners:

Sasha V., David B., Swapan C.

Kudos to energetic IOTA/FAST construction/installation team led by Jerry L. & Sasha V.

Special thanks to Lisa L. for excellent organization!

For the year ahead - we expect to see:

- Successful commissioning of the IOTA/FAST 300MeV injector and beamline – July 2017
- About two month of beam studies with electron injector – Aug-September 2017
- Fast ramp-up of the IOTA installation activities and completion of the ring – ca. April-June 2018
- First beam in IOTA – ca. summer 2018
- VIth IOTA/FAST collaboration meeting/workshop –
summer 2018

We also expect to see:

- Growing IOTA/FAST Collaboration
- More scientific and technical publications, talks at IPAC'18, seminars and presentations
- More students – PhD and Masters, summer students; graduation of some of them
- Progress with all the ongoing experiments
- More proposals for experimental R&D at the time of the VIth IOTA/FAST collaboration meeting/workshop

See you all next year!
