

NuSTEC Workshops

- ◆ IPPP/NuSTEC – April 17-19 in Durham. Already associated with Teppei and Jorge as active members of the organizing committee.
- ◆ NuInt17 – June 25 – 30 in Toronto. Do we want to have NuInt17 covering challenges as part of our strategy to address NuSTEC WP challenges?
- ◆ There are several groups considering associating a workshop with the start/end of the November extended NuSTEC school.
- ◆ Workshop on ν – nucleon physics in 2018 – Considerable community interest in a new high-statistics experiment. Not at all an easy experiment to sell to funding agencies.
- ◆ High-W – Latest INT workshop spent 90% of the time on QE and fundamental nuclear structure (important across W!) 10% on Delta production. The community needs an equally probing look at Delta to DIS region. Very important for DUNE. Do we sponsor and (co-)organize such a workshop?
