

**Finding  $\sim 1.5$  GeV Dark Matter with a  $\sim 5$  GeV/c K-  
beam, as a missing-mass peak in  $K^- p \rightarrow \text{anti-Lambda}$   
+ DM**

*Thursday, 23 March 2017 16:30 (20 minutes)*

**Presenter:** Prof. FARRAR, Glennys (NYU)

**Session Classification:** WG3
