

# Status of E906/SeaQuest (Jan. 30, 2017)

Takahiro Sawada,  
Univ. of Michigan

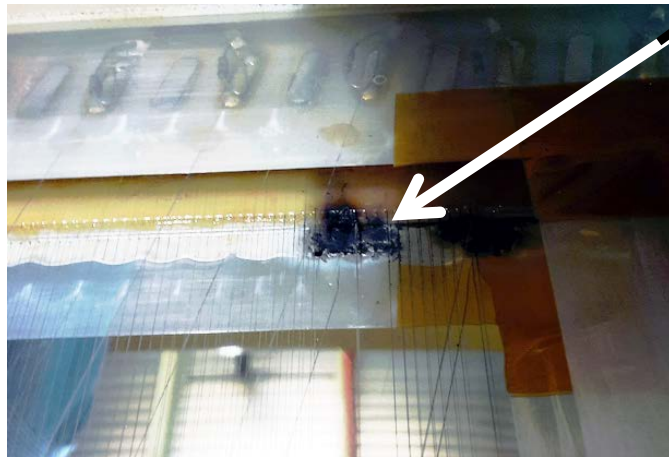

on behalf of the SeaQuest Collaboration

- Thanks for the beam
- DAQ is working.
  - Dead time is about 4 times shorter.
- New decoder is working.
  - checking the timing, efficiency etc.  
(on going)
- D2U was tripped
  - pulled it out and repaired (Next Page)
- Solid targets (C, Fe, W) - prepared.
- No liquid targets ( $\text{LH}_2/\text{LD}_2$ ) - waiting for gas
  
- We expect to take physics quality data from weekend

# Repair of Drift Chamber

Broken cathode wires  
→ Removed

Burnt mylar sheet  
→ Removed

We started to refill the Gas  
(and waiting to reach enough purity)

Thank Wanda Newby
