A particle detector event display showing a complex network of tracks in various colors (blue, yellow, green, red) against a dark background. The tracks are arranged in a roughly circular pattern, suggesting a central collision point. There are also some colored rectangular regions (pink and purple) on the right side of the display.

- Every year we organize the NP conference!

A complex visualization of particle tracks, likely from a detector, showing numerous colored lines (yellow, green, blue, red) radiating from a central point and forming concentric patterns. The background is dark with some white speckles.
