

# Status of E906/SeaQuest (Feb 20, 2017)

Takahiro Sawada,  
Univ. of Michigan

on behalf of the SeaQuest Collaboration

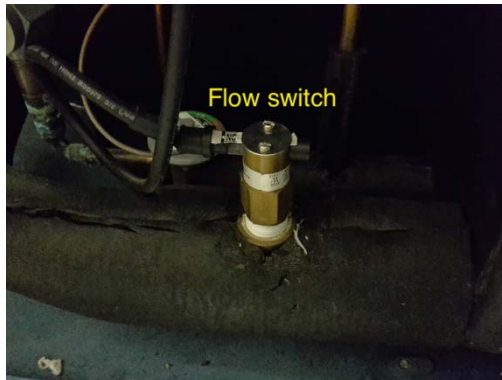

- Thanks for the beam
- DAQ and new decoder are working.
  - Dead time is about 4 times shorter.
  - Checking the trigger timing and efficiency.  
(Almost done)
- Drift Chambers/Hodoscopes/Prop-tubes
  - Ready
- Solid targets (C, Fe, W) - Ready
- No liquid targets ( $\text{LH}_2/\text{LD}_2$ ) – See next page

# Liquid Targets

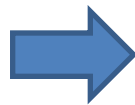

Cool down problem last week

The water chiller for the cryomech's cooler tripped off.

Flow switch need to be replaced → Hopefully tomorrow

Cleaned up the filter

Thank Pete Simon
