Status of Framework CWP Paper

- Late in getting started

- Had two meetings this week with Liz, Chris, Marc to restart the framework part

- We have material for an initial document outline with areas that we want people to contribute to

  – Informed by the January workshop (there is a lot of information collected from that meeting)

  – The outline expands on and clarifies what is in the charge.

  – We are focused on requirements that will be met:

    • common concepts and abstractions and components will be highlighted,

    • deviations will be driven by different goals, constraints, or other requirements

  – There will be a section on **impacts on other groups** since frameworks, in some respects, form a hub between other parts of a full system.

  – https://docs.google.com/document/d/1RXgnmYNkzz9eAlAx7hPCXW1v_kPzdmbjm7R61UM0C-w/edit?usp=sharing

More …

- Need access to the google group for frameworks if possible.
  - Would like to add people that I know will be involved to that group.
- The poll will go out this week for a regular meeting time.
- The June workshop planning has been delayed, partly because of the DS@HEP workshop May 8th.
  - It will be resumed soon.
  - Hopefully we will be able to meet during the DS@HEP week.
- Naturally includes IF and LHC
  - Will likely find that needs of both areas will be similar.
  - Already good discussion here and the outline will reflect this
  - We have all the right people in place here
  - We will certainly be highlighting the benefits of common tools
- Almost everyone involved are senior people that are very experienced
