

AEM report from SeaQuest

Andrew Chen
UIUC

For the Seaquest collaboration
Mar. 13, 2017

Accumulated protons for past week

Status of the experiment

- Both LH2 and LD2 targets were filled last week
- Target rotation is now only on those two targets and the empty flask
- St. 1 has a short and will be pulled for repair starting tomorrow.
- Continuing to take data with the old St. 1 in place and operating.
