University of Pittsburgh

April 3, 2017

Beam Statistics

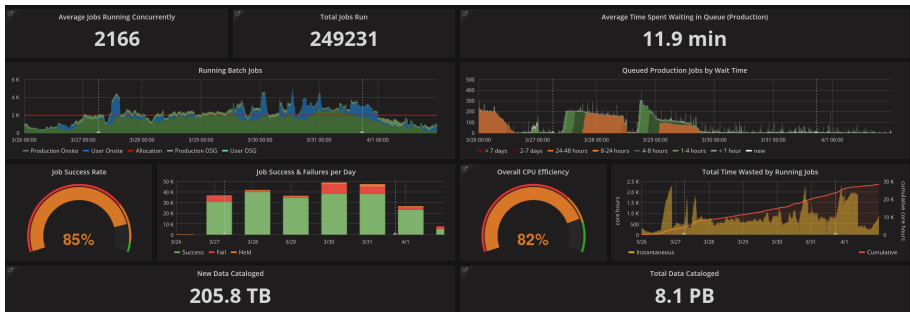

DAQ UpTime (Daily, Past Week)

- Cumulative POT: 9.6e18 On Tape; 9.8e18 Delievered (98%)
- DAQ uptime fraction in the week(Mar27):97.7%

Computing Summary

Summary

- Good week for MicroBooNE. Running stable at drift HV 70 kV.
- CRT top panel fully commissioned and operational.
- Ongoing HVAC installation at LArTF. Recommended by technical board for cooling the electronic racks with CRT top in.
- Planning special calibration runs for beam downtime during multimode fiber cable replacement (8 hours downtime) in April.
- Since April 1, David Martinez (IIT) is the new MicroBooNE Run Coordinator, Deputy Run Coordinator is Kevin Wierman (PNNL)
