

DAQ sessions – draft for discussion at Coordinators Mtg, 2017 Apr 14

Usual sessions: DAQ for FD; DAQ&SN joint; one or two ProtoDUNE

- The ProtoDUNE sessions are essential (Karol/Giovanna to choose).
- Important consortium-building DAQ goals for May collab meeting:
 - 0. Document current ideas to a level to facilitate new groups to make funding requests
 - Physics requirements driving DAQ design choices
 1. LArTPC [We are progressing well on this part]
 2. Photon detectors [How they are used in trigger, how to read out data: which hits to save for which trigger types]
 3. Supernova
 4. Level 3 processing (final farm processing before permanent storage.

How to best combine these into sessions? Perhaps have

- (a) A session joint with SN and PD groups to hash out 2., 3.
- (b) A DAQ session for catching other topics and for 0., 1., 4.
