

Users Meeting

Tammy Walton, Thomas Strauss, Sarah Lockwitz

June 2017 UEC Meeting

9 June 2017

Reception

- Thumbs up!
- Hors d'oeuvres were something new.
 - Some thought the cheese and crackers were it,
 - But afterward, people figured it out
- Avoided line complaints from previous years
- No food ticket hassles. When food is out, food is out — fine.

More Examples...

Poster Session

- Beer, crudités, pretzels worked
- Good turnout (even after a long two days)
- Winners:
 - 3rd Adam Lister, 2nd Davio Cianci, 1st Daniel Baxter
 - Prizes from FSPA budget (\$500 total), certificates signed by Nigel

Feedback?

- Is it possible to send out a survey to all users for feedback?
- Did you attend: Festa, Symposium, Users Meeting, Banquet, Poster Session?
 - If so, what % of the Symposium, Users Meeting?
 - Thoughts on talks — too technical, too much of an overview/not enough detail, just right
 - If no, why not? Schedule, Told it was full, limited benefit to me, had to work/no task code, something came up
 - Historically, do you attend the Users Meeting?
 - In the past, did you attend the public lecture?
 - Would you be more or less likely to attend the UM if it straddled a collaboration meeting
 - 1 or 2 days?
 - What do you think the goal of the UM should be? Be educated on what's going on at the lab, get the status of what's going on at the lab, see friends/socialize, visit my experiment, learn about new physics results, highlight milestones/achievements at the lab
- What feedback did you get?

Ways to Improve

- Tours? Physics slam?
- Schedule — in the past, it's been Tues: Festa, Wed: Meeting, Banquet +Poster, Public lecture, Th: Meeting
 - Wed: Meeting+keynote speaker, poster, banquet+poster, festa
 - However, challenging to put it in one day
 - Ideas?
- Festa —
