collaboration)

Beam

Computing Summary

General Status

Target

- Taking good data with solid targets and liquid Hydrogen

DAQ

- MainDAQ – occasional minor VME ROC problems
- ScalarDAQ – working
- BeamDAQ – working

Spectrometer

- Beam vacuum pipe, cherenkov counter, hodoscopes, online monitoring, prop tubes – **all stable**
- Station 1 drift chamber not being used for physics. Flowing new gas in dc1 and testing it soon. dc0 is being used for physics.
