

# *The MINERvA Operations Report*

Nuruzzaman

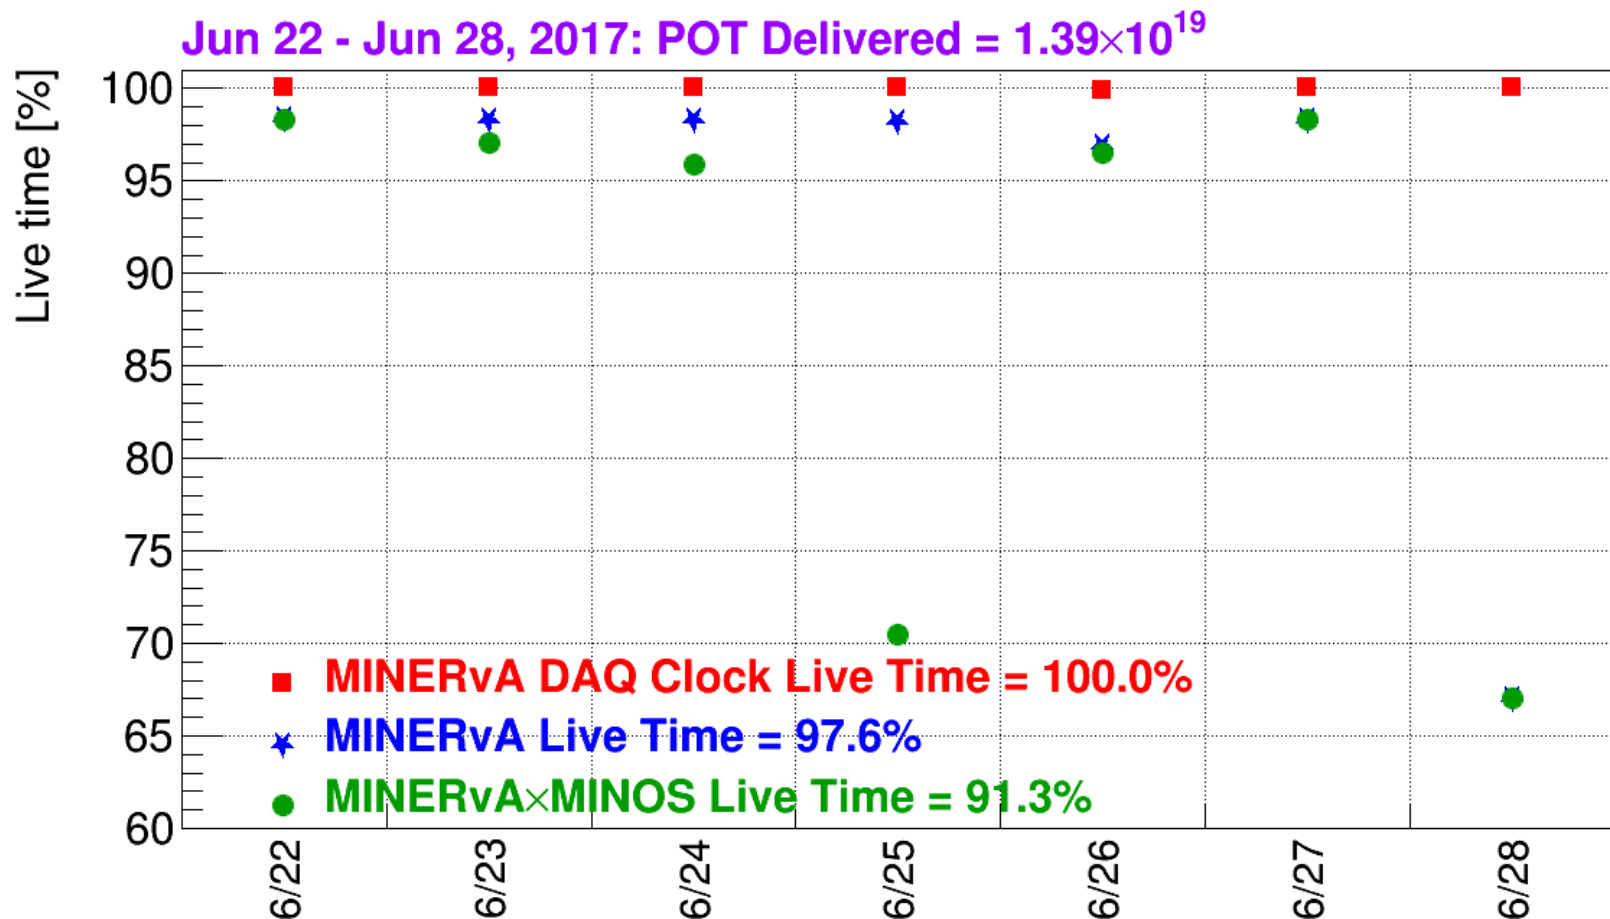

([home.fnal.gov/~nur/](http://home.fnal.gov/~nur/))

for the MINERvA Collaboration

All Experimenters Meeting

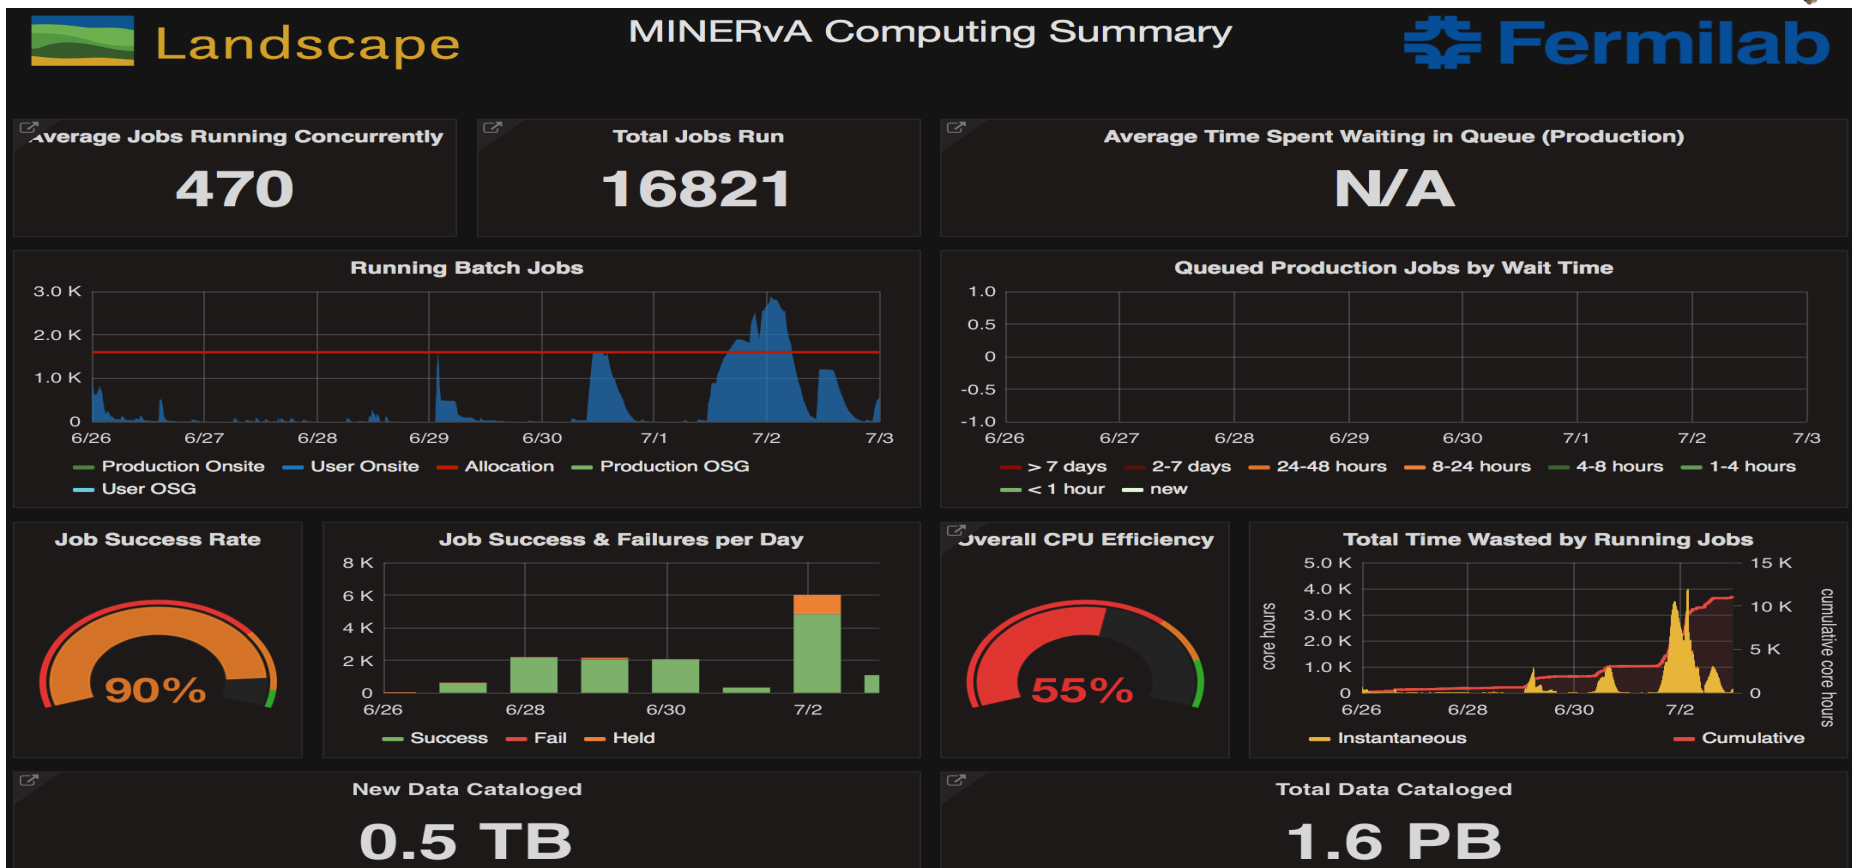

3 July 2017

# Live Time and Data

- ❑ 06/25 Sun – MINOS rack power failure
  - Replaced the blown input AC fuse and swapped a new Wiener PS
- ❑ 06/28 Wed – Keep up failed to process few files
  - Resubmitted the jobs and should recover the files

# Computing

- Average concurrent jobs are low
  - Job success rate is 90%: input file was not pre-staged on disk for one user's job which was on held due to time limit
  - Overall CPU efficiency is low
    - dCache was not stable on 06/29,30
    - One user's job read input file from the tape
- Period 06/26 - 07/02, 2017

# Thank You
