

# **Automation of Synchrotron Radiation Beam Monitor for IOTA the Ring**

*Tuesday, August 15, 2017 9:20 AM (20 minutes)*

Supervisor: Alexandr Romanov

A summary of the project to build a prototype model to approximate and study the behavior of the synchrotron radiation beam on the monitors, as well as studying different algorithms for automatizing the procedure of focusing these monitors.

**Presenter:** Mr RODRIGUEZ GUTIERREZ, Leonardo (University of Illinois at Urbana-Champaign)
