includes

DAQ Status and Uptime: NearDet

88.675% uptime for the last 4 weeks (NearDet) – 91.4% excluding testing time

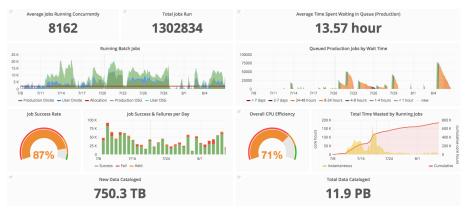

Shutdown Work

Last Month NOVA Computing Summary

- The 2017 production campaign is now in its final stage, focusing on antineutrino data and simulation.
 - NOvA computing is not over, though, as analysis work is now in high gear.
- Preparations are also beginning now for the "2018" production campaign which is planned to start this Fall.
