Worker involvement in Security at a DOE Lab

Wednesday, 14 May 2008 11:00 (40 minutes)

Ten thousand dollars. The approximate direct cost of an incident.
Some estimates of IT related security incidents can be ten times that.
VPP is an business architecture and third party verification for safety
that has proven to reduce incidents by fifty percent. Cyber, physical and
social engineering security for our organization is just as important to
an organization.
