Exchange 2007 Pilot at LANL

Monday, 12 May 2008 13:30 (40 minutes)

IST & CTN divisions have collaborated to implement an Exchange 2007 Pilot at LANL. I will discuss the technical architecture, testing methodology and deployment strategy/considerations of this solution. The next phase of this pilot involves the implementation of a Blackberry Enterprise Server architecture. Come learn how LANL implemented this technology and the lessons we learned along the way.
