The Federal Desktop Core Configuration (FDCC)

Monday, 12 May 2008 15:30 (40 minutes)

The Federal Desktop Core Configuration (FDCC) is a common security configuration that provide a baseline level of security. OMB in collaboration with DHS, DISA, NSA, USAF, Microsoft and NIST have provided the FDCC baseline.

Learn how and why Sandia is making the integration of the FDCC policies an integral part of their planned Vista Deployment. Topics include, looking at the policies in a focus group, overcoming application incompatibility, deploying the Vista image in the locked down state.
