ORNL's Microsoft System Center Configuration Manager

Wednesday, 14 May 2008 11:45 (40 minutes)

Learn how Oak Ridge National Laboratory uses Microsoft System Center Configuration Manager (SCCM) to maintain Microsoft Windows and Office updates, reduce IT cost with remote desktop, enforce configuration standards, leverage SCCM reporting, application and operating system deployment. This session will cover ORNL's migration from SMS 2003 to SCCM 2007 and will discuss and demonstrate some of the key features that ORNL is leveraging today.
