InDiCo - An Opensource Meeting/Workshop Conference Tool

Monday, 12 May 2008 11:45 (40 minutes)

InDiCo (Integrated Digital Conference) is a web application developed at CERN (and supported at FNAL and CERN) for scheduling events.

The software allows a user to schedule events, from simple talks to complex conferences with many sessions and contributions.

The software provides many user delegation features. It also provides mechanisms for reviewing papers, conference material archival and much more.
