SharePoint as the ORNL Portal

Tuesday, 13 May 2008 11:00 (40 minutes)

Bio: Connie Begovich has worked in IT at ORNL for more years that she cares to admit. Since last summer, she has been working on a special team that was chartered to learn the .NET environment and to develop and standardize ways to incorporate ORNL web applications/information into SharePoint. Previous to that, she worked on the ORNL SAP team.

Abstract: ORNL has chosen SharePoint as their portal methodology for the internal users. The following techniques that are being developed and used in this environment will be described:
• Setting up Division sites and training the Division staff to handle the maintenance of these sites
• Developing web parts to reduce emails and have a central place for users to find information
• Providing useful searches
• Integrating line of business applications into SharePoint
• Deploying reports in a standard way
