

NOvA experiment report

Ashley Back

Iowa State University

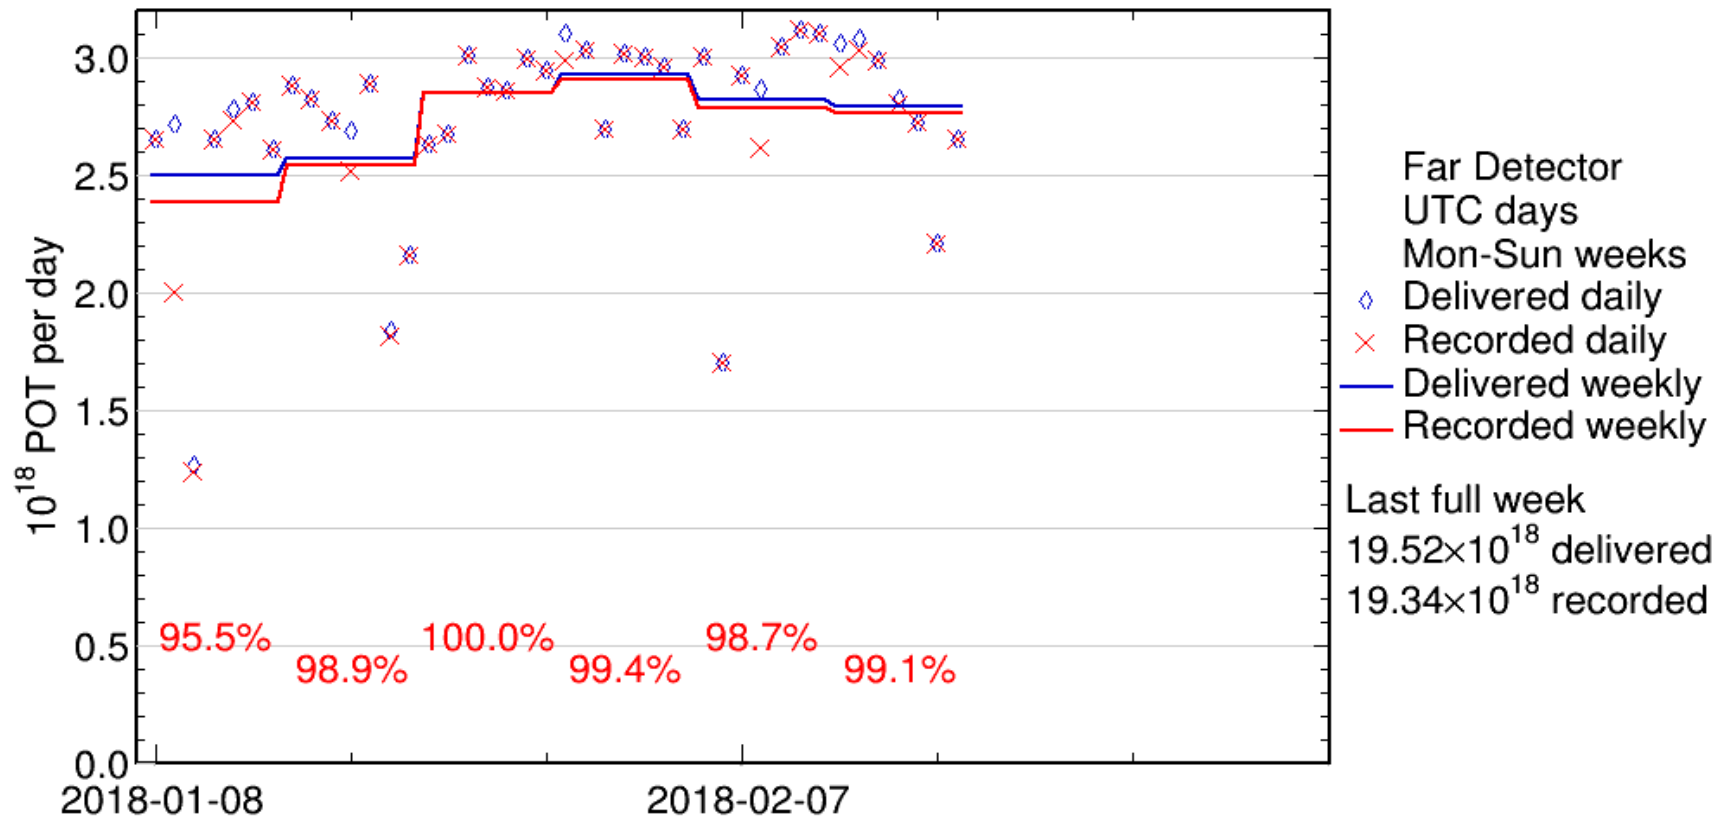

19 February 2018

Summary

- Generally smooth running
- Successful maintenance work on the dry gas system at Ash River, to replace a compressor

FD summary

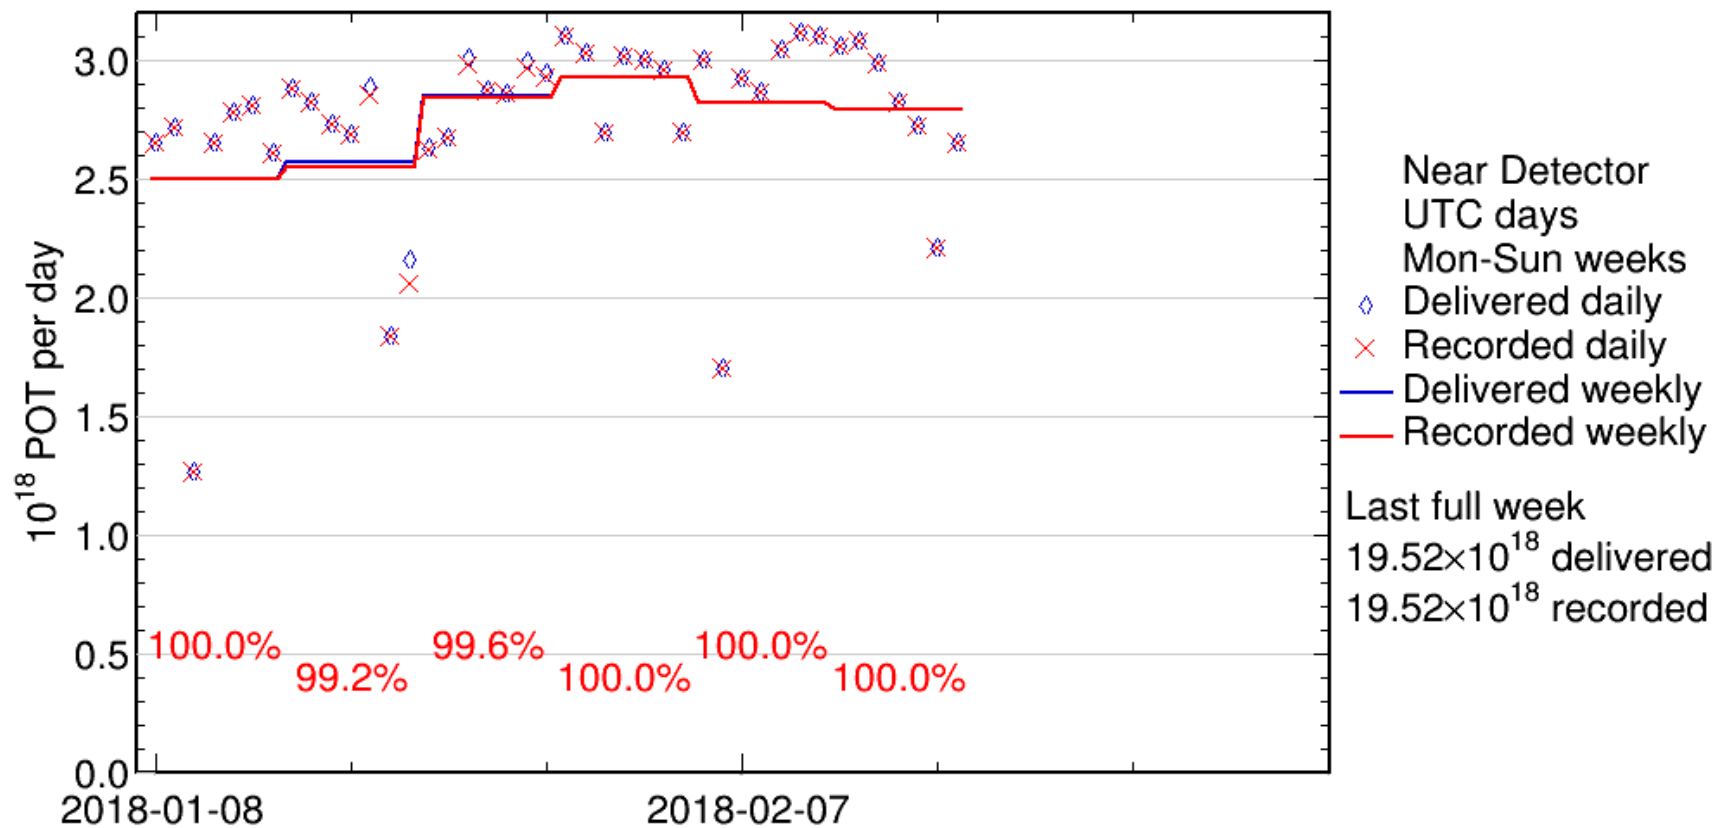

4-week mean POT-weighted uptime: 99.3 %

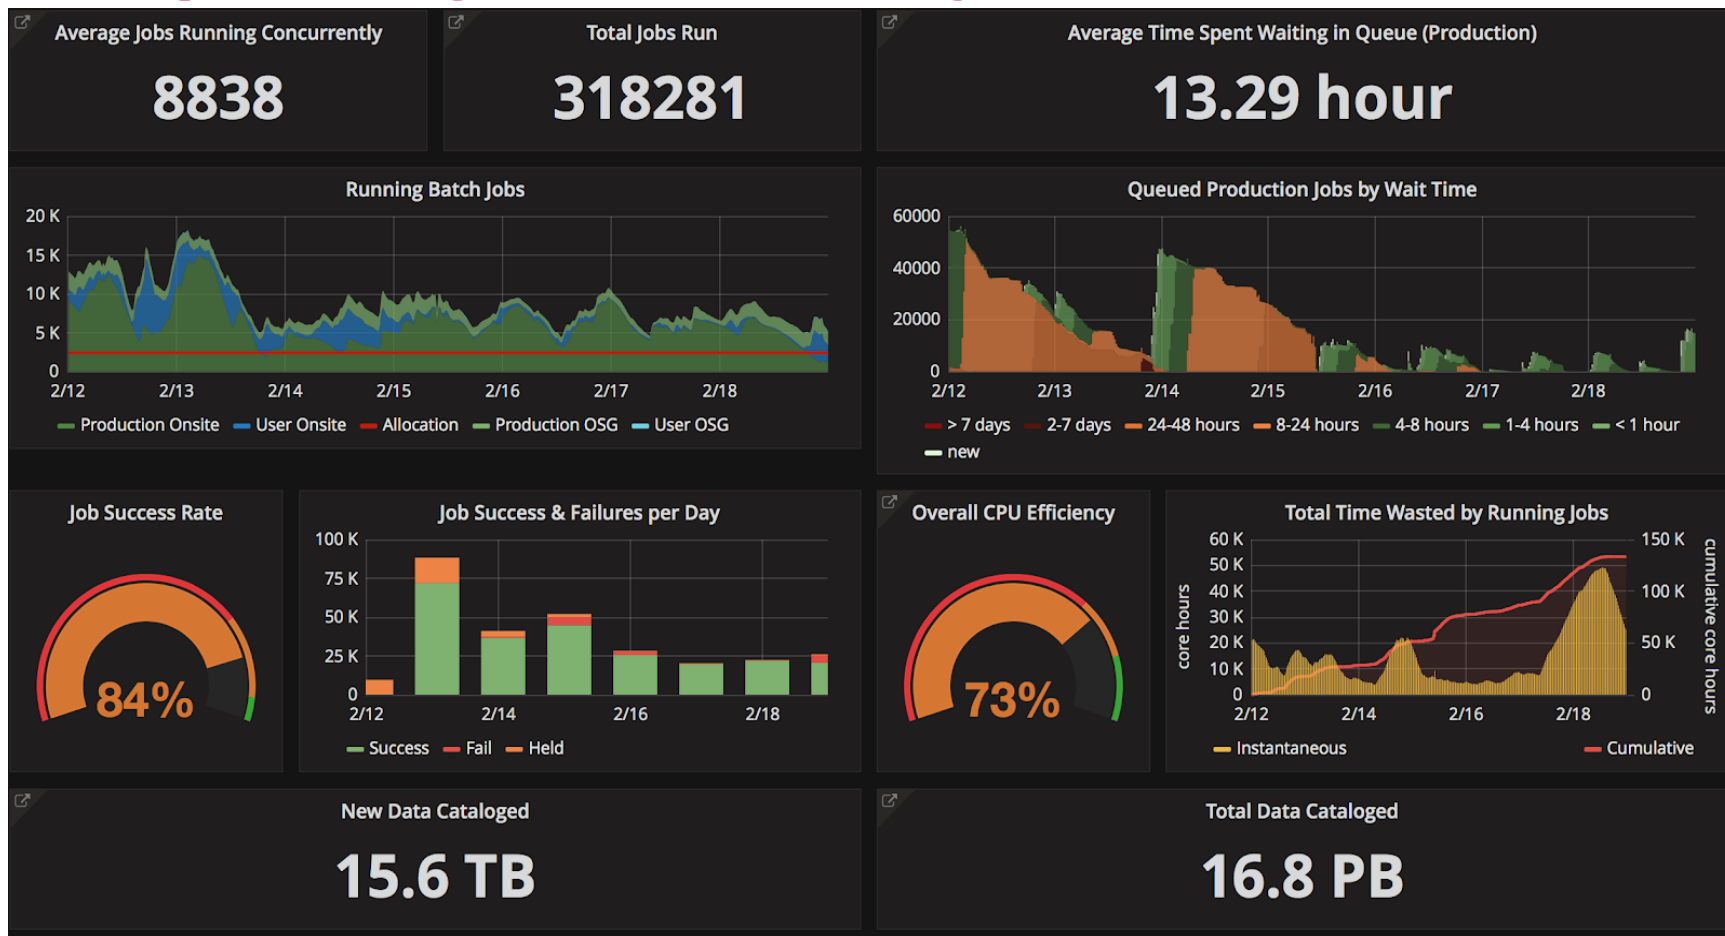

- FY18 POT: 21.3 E19 delivered | 20.9 E19 recorded
- Total neutrino mode POT delivered: 124.06 E19
- Total anti-neutrino mode POT delivered: 60.06 E19

ND summary

4-week mean POT-weighted uptime: 99.9 %

Computing summary

- Winter campaign push is continuing, with very reliable job consistency on FermiGrid.
- Reaching the end of the campaign where systematic samples are produced so job volatility is expected.
