

# MicroBooNE Status Update

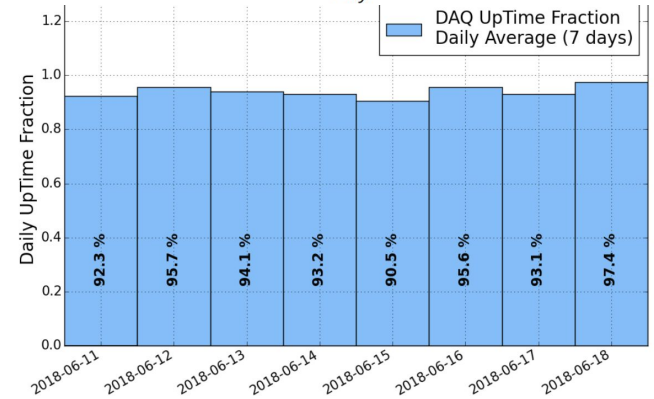

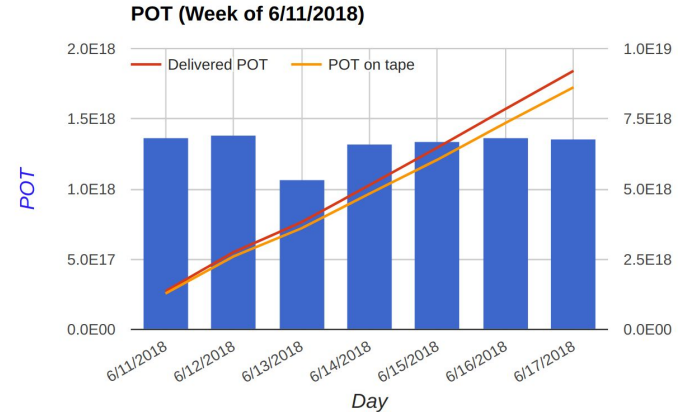

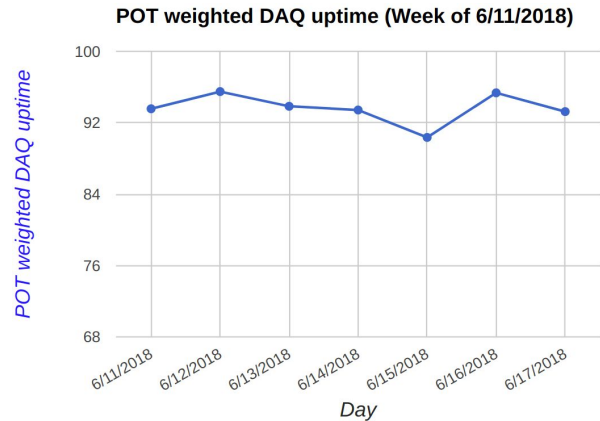

Andrew Mogan

All Experimenters' Meeting  
6/18/18

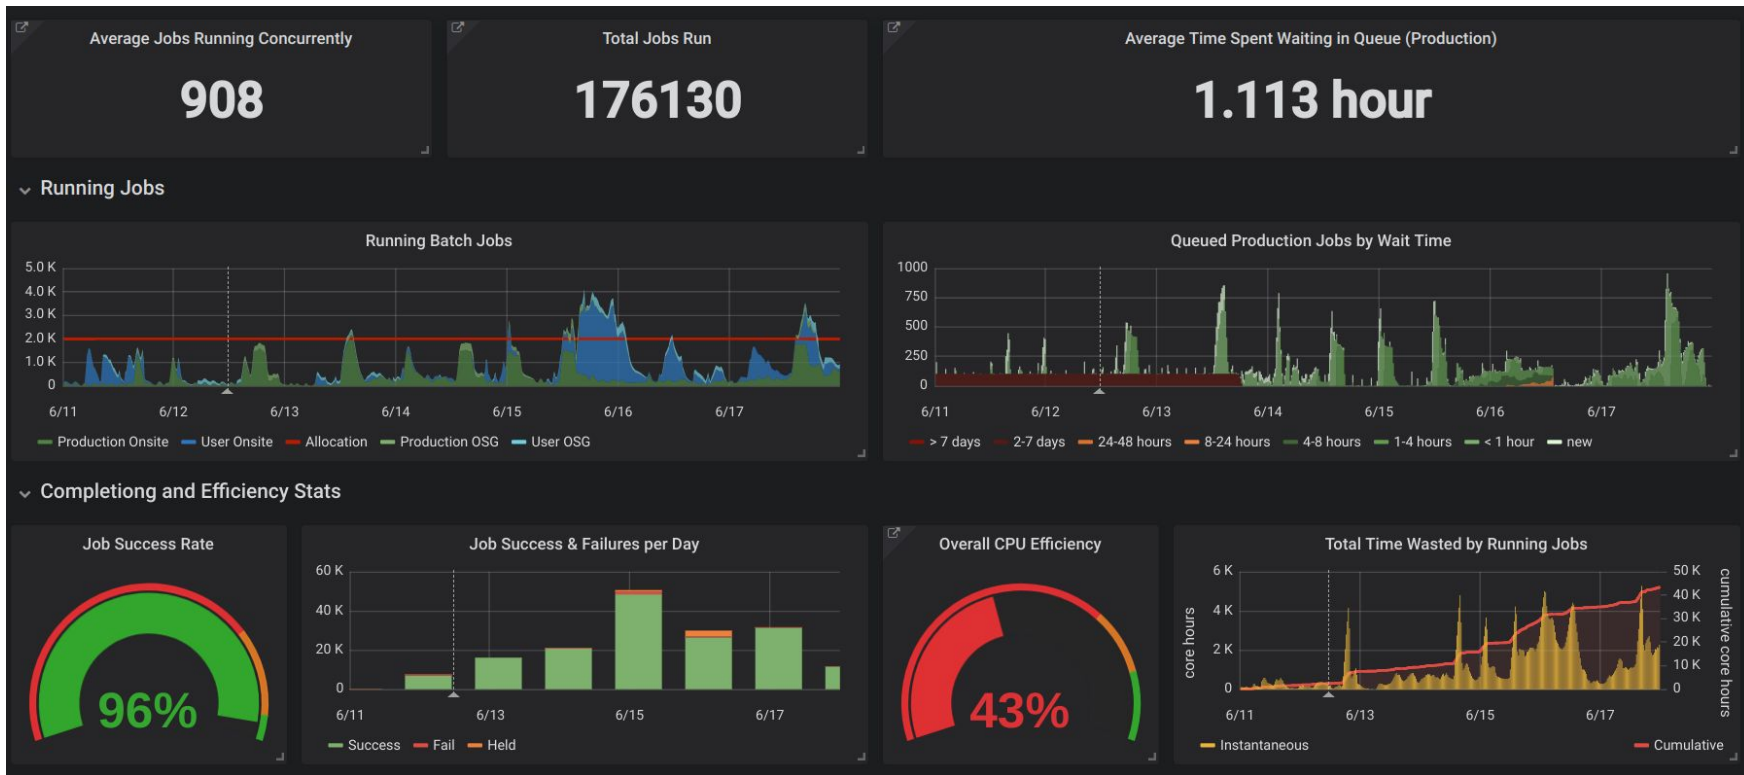

# DAQ/POT Statistics

- POT delivered: 9.21E18
- On tape: 8.62E18 (93.6%)
- BNB uptime: 94.7%

# Computing Summary

# Updates

---

- Completed purchase order for DAQ replacement
- Evb and RAID have arrived at FNAL
- Working on finalizing summer shutdown schedule
  - Evb replacement planned mid-July
  - Larger DAQ replacement in August
- 8-hour beam downtime today to study DAQ/readout stability
- This week, switch to the newly routed single-mode fibers used for AD beam signals at LArTF
- UPS switch does not appear to have impacted argon purity
