Giuseppe Cerati  
Lynn Garren  
Katherine Lato  
Paul Russo  
Saba Sehrish  
*Fermilab*

Aug 14, 2018

## Today's agenda and speakers

- Release and project report (Erica)
- Spack / SpackDev update (Chris Green)
- External building of consolidated Pandora events (Andy Smith)
- AOB

# Releases

- Last week
  - V07\_00\_01 released on Aug 2
    - TrajCluster restructuring, slicing updates
    - Cluster3D update
    - Event display changes
- This week
  - No merge requests at present
  - Bug fix for larana test failure on MacOS
    - Missing destructor in PhotonVisibilityService
  - NOTE: the **release this week will be the last with e15** support
    - If this is a problem, let us know ASAP

# Change in CI system support

- The CI system is moving into maintenance mode
  - **Operations support for the system will no longer be available**
  - Vito will continue his involvement in development + consultation

- This system is critical to maintaining the stability of the development environment and the integrity of the code

It is imperative that monitoring continue, and problems get addressed promptly

- Moving forward, we request that **experiments** organize their effort to **monitor the system and respond to problems**
- Will be asking for plans to do this by the end of the month

The end
