

# *MINERvA Operations Report*

Nuruzzaman

([home.fnal.gov/~nur/](http://home.fnal.gov/~nur/))

for the MINERvA Collaboration

Proton PMG

4 October 2018

# MINERvA Summer Plan

- Setup and check Lab-F Test Stand
  - ✓ We use the test stand to checkout spare hardware components
  - ✓ Use for development of DAQ and Online Monitoring software
  
- Replace faulty Front End Boards (FEB) and PMTs on main detector
  - Chain 0-4-0 is giving us errors and stopping the DAQ. Replaced 6 FEBs on the chain yesterday, the CROCE, the connector cables, still investigating.
  - ✓ Also replaced 1 FEB on chain 0-4-1 that was giving communication error
  - ✓ Replaced 6 (All) FEBs on chain 1-6-2 where the water was dripping on the detector during last day of beam before shutdown.

# MINERvA Summer Plan

- ✓ Drip pans are repaired now and no more water leak on detector

- Online Monitoring system broke after last power outage
  - ✓ Almost working, its processing the data and producing the plots now.
  - Can run manually, working on fixing the automation part. Will be able to monitor data in a semi-automated way if beam arrives today.
- Clean FESB Power Supplies
  - We plan to do this next week (noninvasive)

# Control Room Shift Machines

- ROC West shift computer (minerva-cr-01) had video card failure
  - ✓ Fixed now
- Need to upgrade minerva-cr-{01-03}
  - ✓ SLAM group formatted and reinstalled the systems to load them in new infrastructure
  - ✓ Completed, tested and ready for shifts

# MINOS Summer Plan

- Replace all rack rear filters; find new filters for LeCroy HV crates
  - ✓ Completed
  
- Clean HV cards and backplane in rear of LeCroy HV crates
  - In progress
  
- Magnet/Magnet Power Supply/LCW skid work:
  - ✓ Annual maintenance and repair; practice reversing polarity (Thanks Walt Jieskerney)
  
- Clean and improve MINOS DAQ rack
  - Plan for next week

# MINOS Summer Plan

- Add new VMware Windows XP instance for video server readout of MINERvA cameras
  - Noninvasive
  
- Update the two MINOS Desktop computers to SLF 6.8 and put them on SLAM infrastructure
  - Noninvasive, will do it next week
  
- Replace a RPS Box giving fake fan failure message
  - Completed
  
- Replace hardware that fails during the shutdown: MINDER boards, MASTER boards, power supplies ...
  - ✓ All the failed components are replaced and we are ready for beam

Thanks to Steve Hahn and Donatella Torretta for continuous support

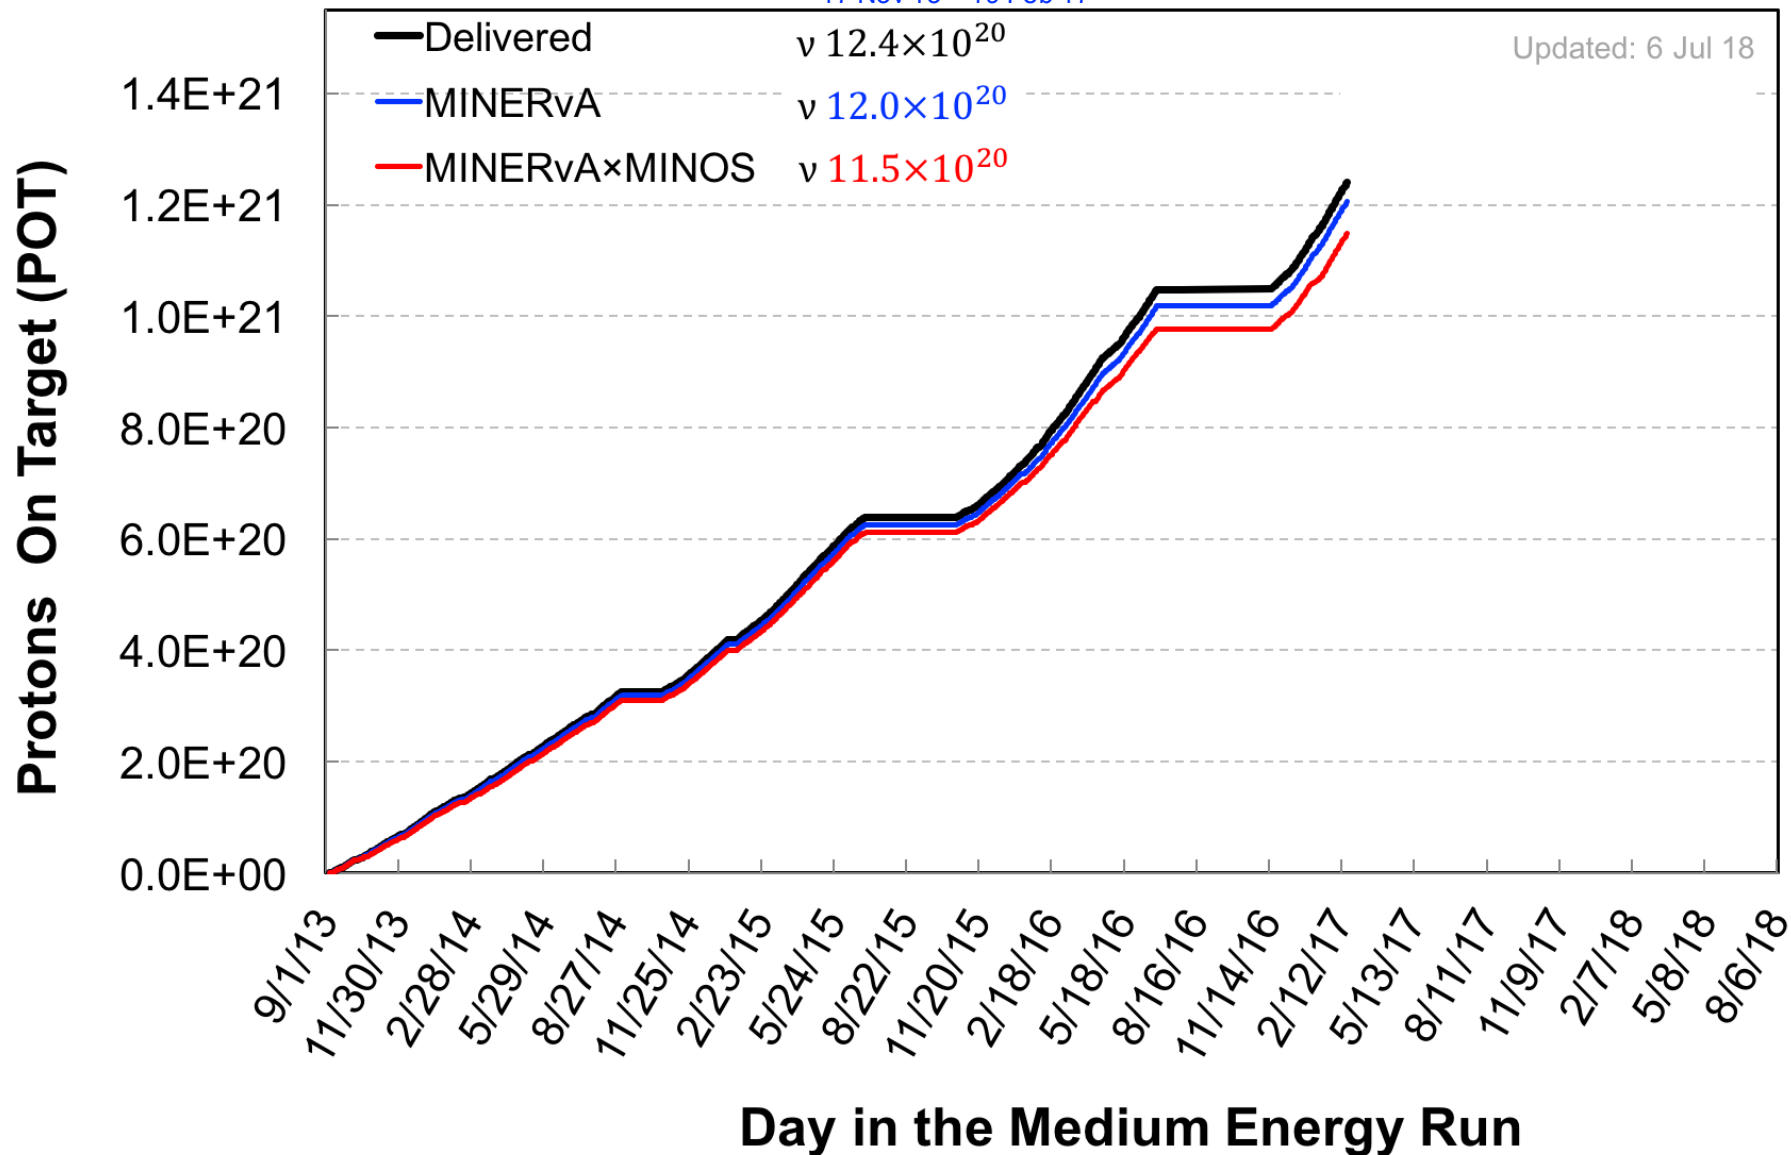

# ME Proton On Target

Neutrino:

06 Sep 13 – 29 Jun 16

17 Nov 13 – 19 Feb 17

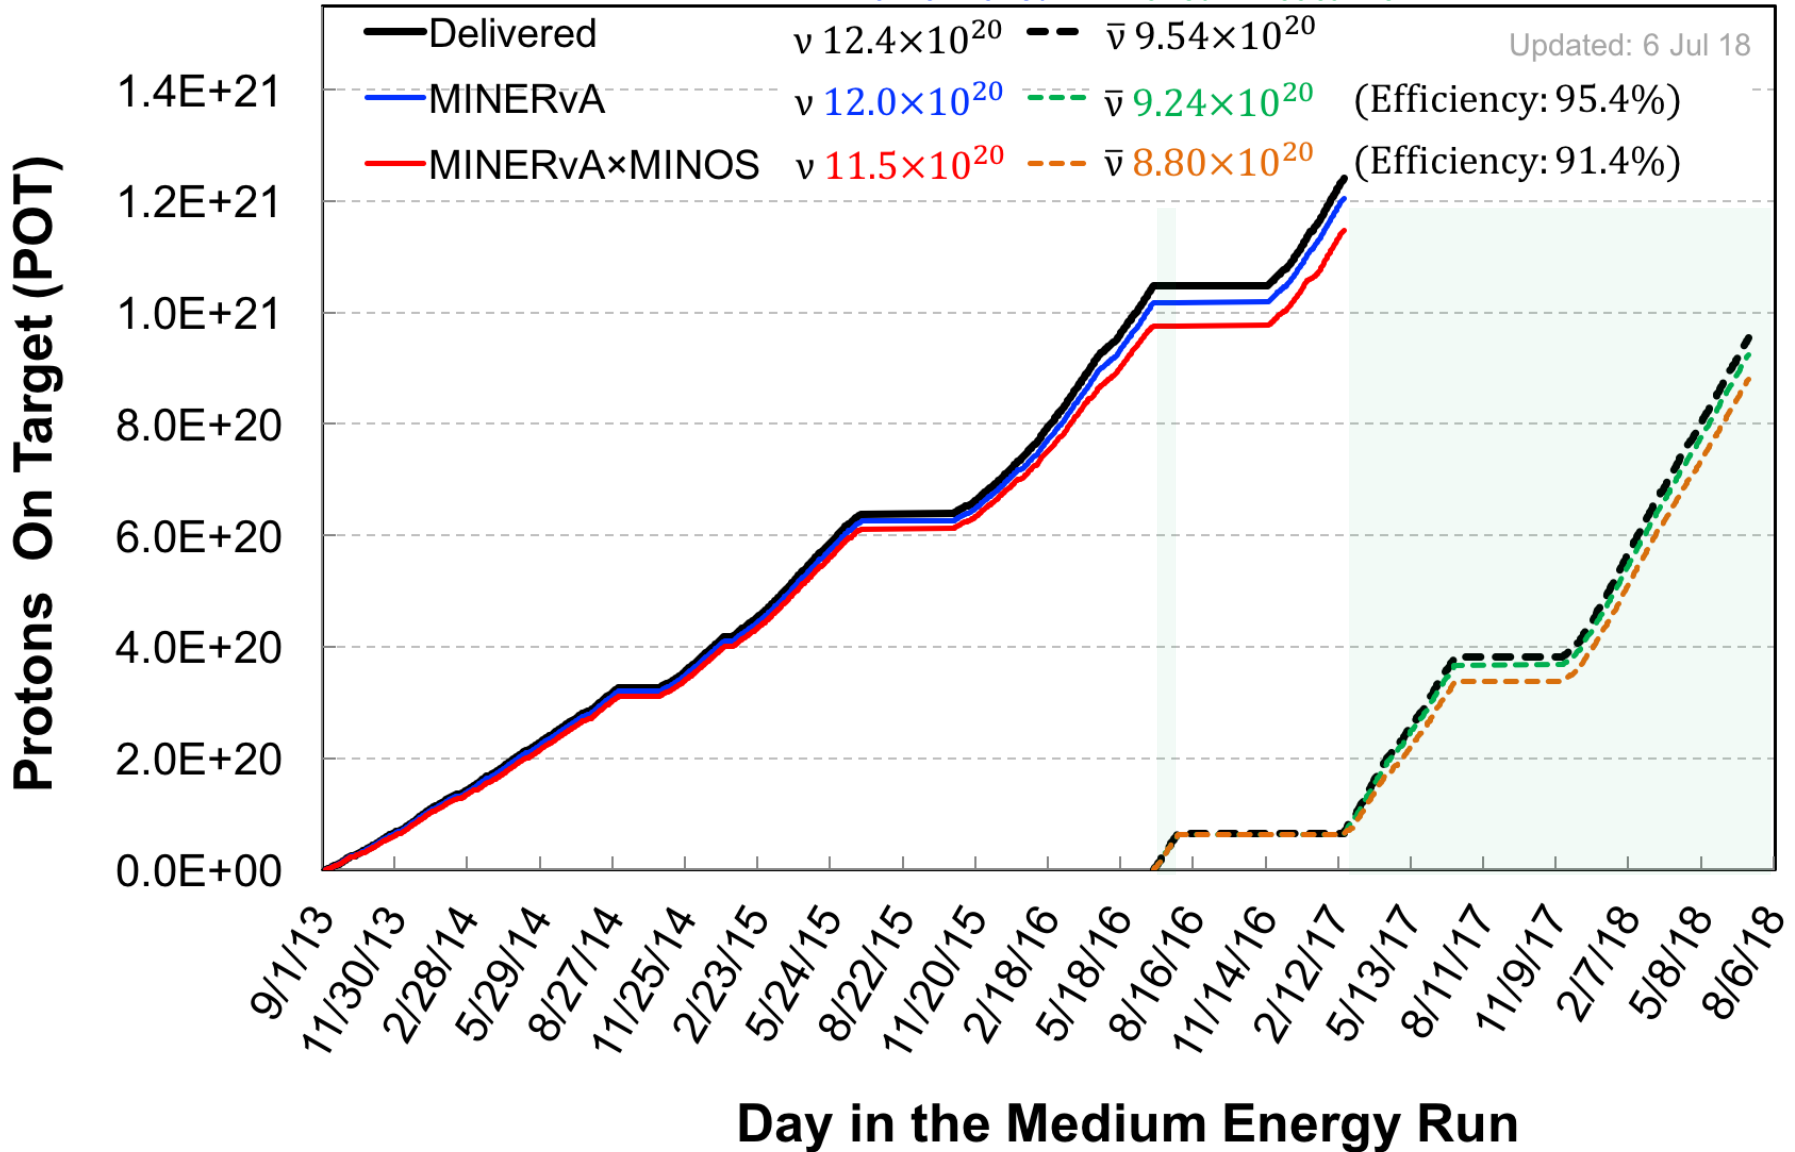

# ME Proton On Target

**Neutrino:**  
 06 Sep 13 – 29 Jun 16  
 17 Nov 13 – 19 Feb 17

**Anti-neutrino:**  
 29 Jun 16 – 10 May 17  
 20 Feb 17 – 06 Jun 18

---

# Thank You
