# Muon Department Journal Club

... is back!

Have some pizza!

A meeting to talk about Muon Physics, focused on early-career scientists

Asking questions and starting discussions is a hard skill to develop

- Especially in a room full of senior scientists

Here you are encouraged to interrupt respectfully and ask questions

## Senior participation

- With that in mind:  
Do we want a few senior people (perhaps by invitation) to attend future meetings?
- We want to elevate these meetings, but without taking away from the focus on early-career participation
- A poll will be set up to decide, tell us what you think

# Muon Campus SMP Tours

## Saturday Morning Physics

- High school students and their parents

## Mu2e's 1st SMP season!

- Students can walk the path of a Mu2e muon

A g-2 script and resources already exist, will be amended with Mu2e

- Practice tours will be given to guides
- Help us shape the tour and experience for students

## Volunteers still needed!

- Dates: Oct. 13, 20, 27, and Nov. 3
- You may tour either or both experiments
- Contact Brendan K or me
