

Weak pion production in BChPT

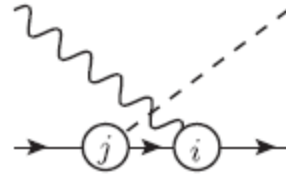

- Yao et al., Phys.Rev. D98 (2018) 0760044
- First comprehensive study in ChPT
- EOMS
- Explicit $\Delta(1232)$
- $O(p^3)$
- $\delta = m_\Delta - m_N \sim O(p^{1/2})$
- Tree level:

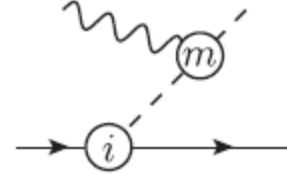

(a)

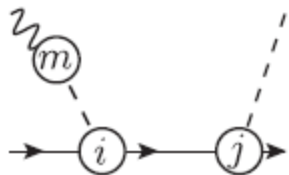

(b)

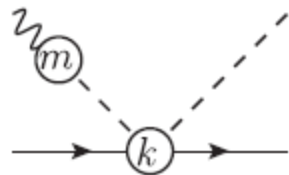

(c)

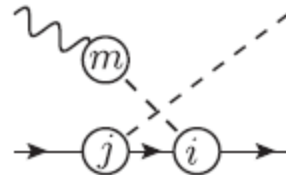

(d)

(e)

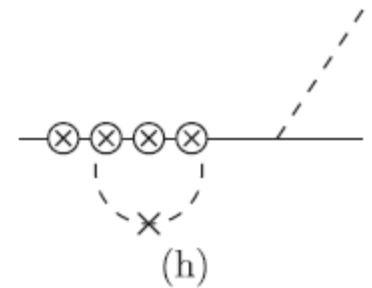

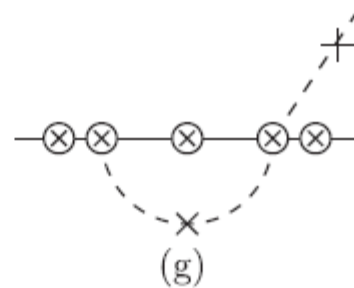

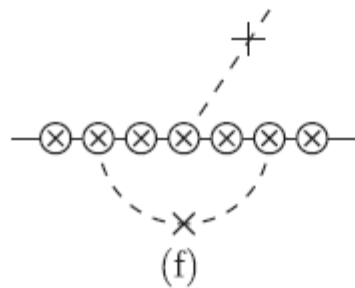

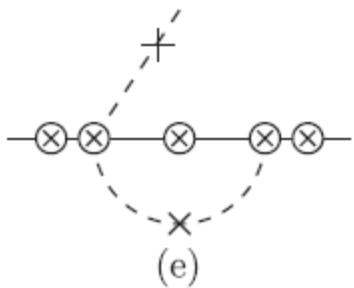

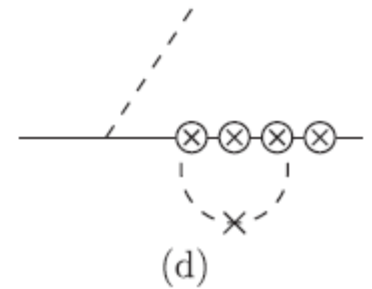

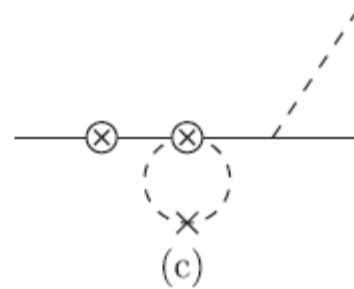

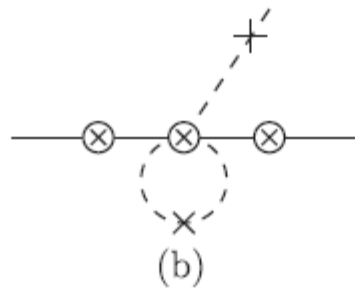

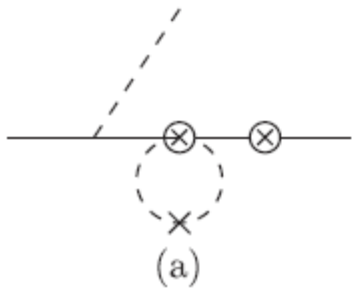

(f)

(g)

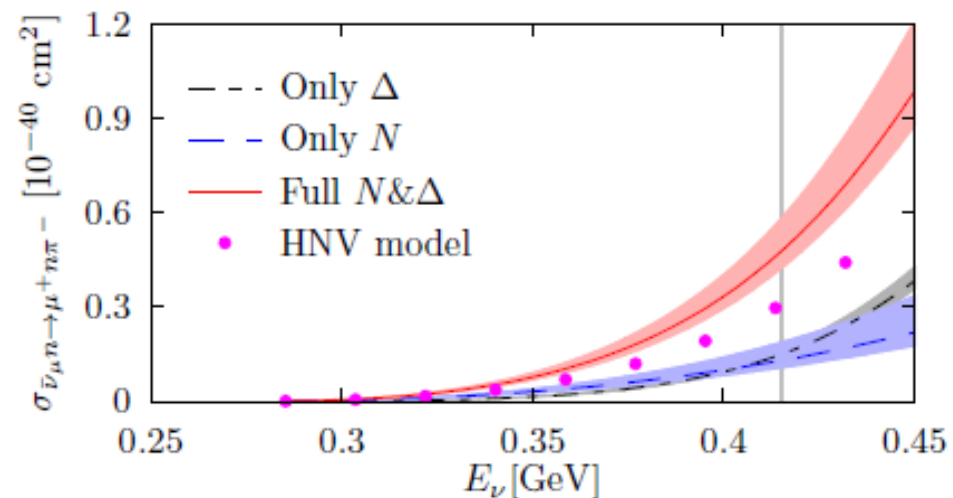

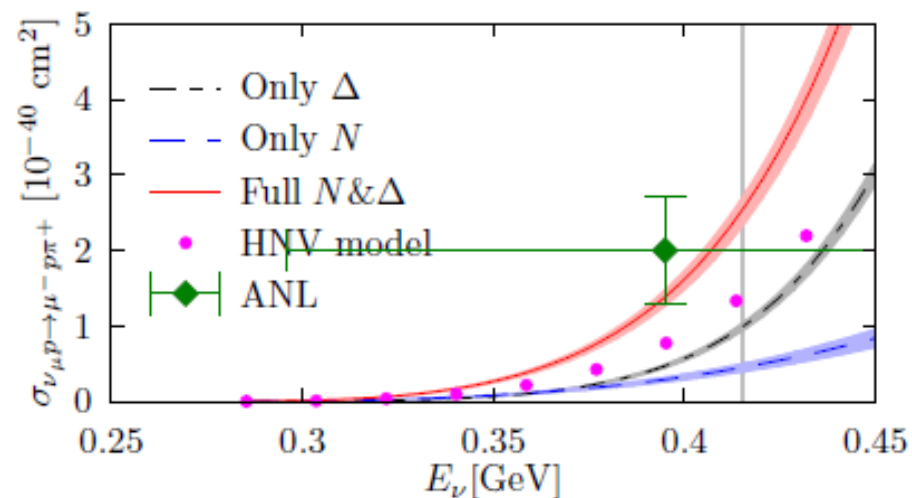

Weak pion production in BChPT

- Yao et al., Phys.Rev. D98 (2018) 0760044
- First comprehensive study in ChPT
- EOMS
- Explicit $\Delta(1232)$
- $O(p^3)$
- $\delta = m_\Delta - m_N \sim O(p^{1/2})$
- Some **loop** graphs:

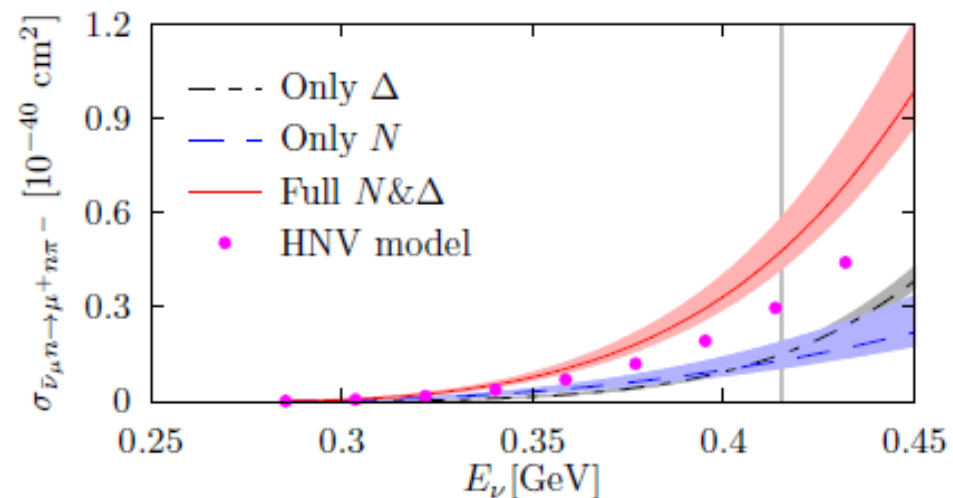

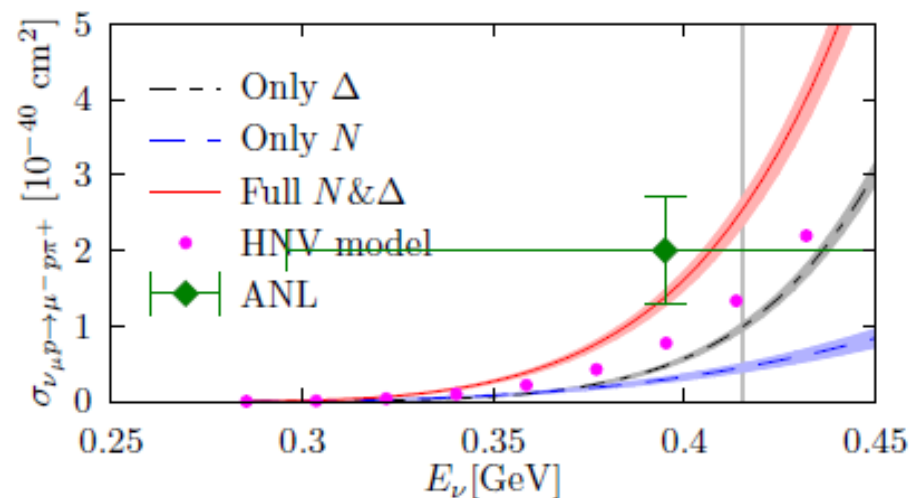

Weak pion production in BChPT

- Yao et al., Phys.Rev. D98 (2018) 0760044
- First comprehensive study in ChPT
- EOMS
- Explicit $\Delta(1232)$
- $O(p^3)$
- $\delta = m_\Delta - m_N \sim O(p^{1/2})$
- Valid only close to threshold
- Benchmark for phenomenological models and generators

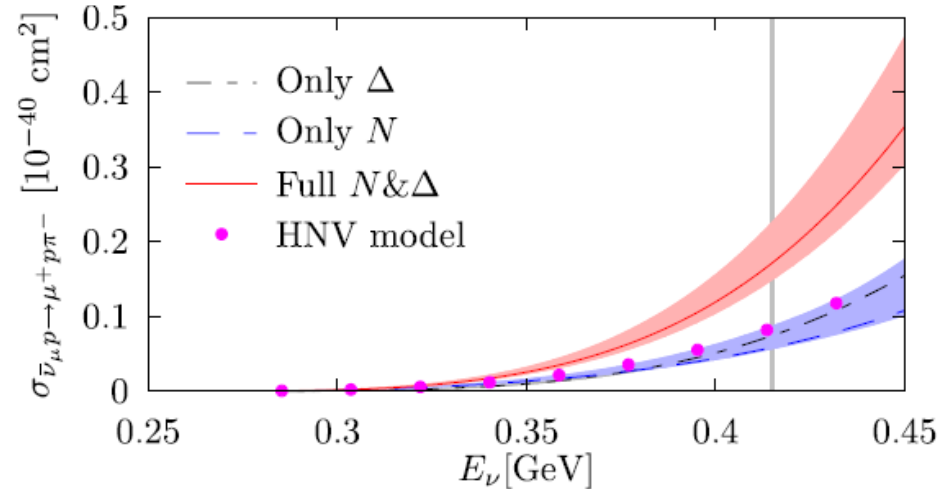

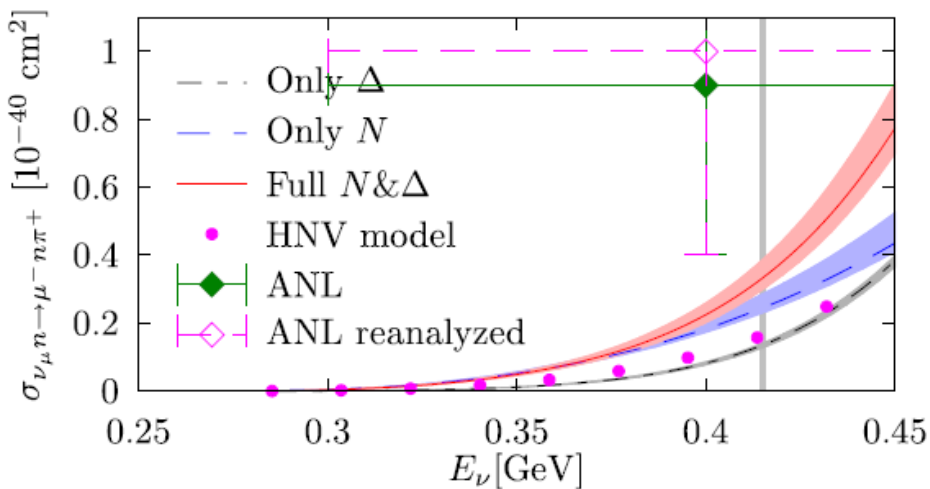

Weak pion production in BChPT

- Yao et al., Phys.Rev. D98 (2018) 0760044
- First comprehensive study in ChPT
- EOMS
- Explicit $\Delta(1232)$
- $O(p^3)$
- $\delta = m_\Delta - m_N \sim O(p^{1/2})$
- Valid only close to threshold
- Benchmark for phenomenological models and generators

Weak pion production in BChPT

- Yao et al., Phys.Rev. D98 (2018) 0760044
- First comprehensive study in ChPT
- EOMS
- Explicit $\Delta(1232)$

Weak pion production in BChPT

- Yao et al., Phys.Rev. D98 (2018) 0760044
- First comprehensive study in ChPT
- EOMS
- Explicit $\Delta(1232)$
- $O(p^3)$
- $\delta = m_{\Delta} - m_N \sim O(p^{1/2})$
- Valid only close to threshold
- Benchmark for phenomenological models and generators
- LECs :
 - 22 in total
 - 7 unknown (but not very relevant)
 - 4 of them can be extracted from pion electroproduction
 - information about remaining 3 LEC could be obtained from new close-to-threshold measurements of ν -induced π production on protons
- Extension to NC almost finished
