

Globalization

22 Feb 2019

Andrew McNab
University of Manchester

Mainly concerned with new sites

- FNAL and CERN, then UK sites last year
- Now on-boarding :
 - CC-IN2P3, Lyon, FR
 - NIKHEF in Amsterdam, NL
 - TATA Institute, IN
 - KISTI, KR
 - Others ...?
- Mostly DPM/dCache storage so far
 - Some local solutions (eg ECHO at RAL)
- So far jobs either to local batch (eg CERN lxbatch), or via the FNAL Condor pool
 - Some may start being submitted via DIRAC

More info

- Open to non-DUNE members, so site sysadmins can participate:
 - Monday meetings at 9am FNAL time
 - Mailing list dune-computing-sites@fnal.gov
- Some material in the wiki
 - eg https://wiki.dunescience.org/wiki/DUNE_Computing/Onboarding_a_site_for_DUNE
- Maybe we should refactor (or just rename?) this area to be “site support”, “sites liaison”, “sites XYZ”?
