

# Test Beam Status

Mandy Rominsky  
Proton PMG/AEM  
04 April 2019

# Beam Plots

Note that we will re-evaluate the red/blue lines for next year

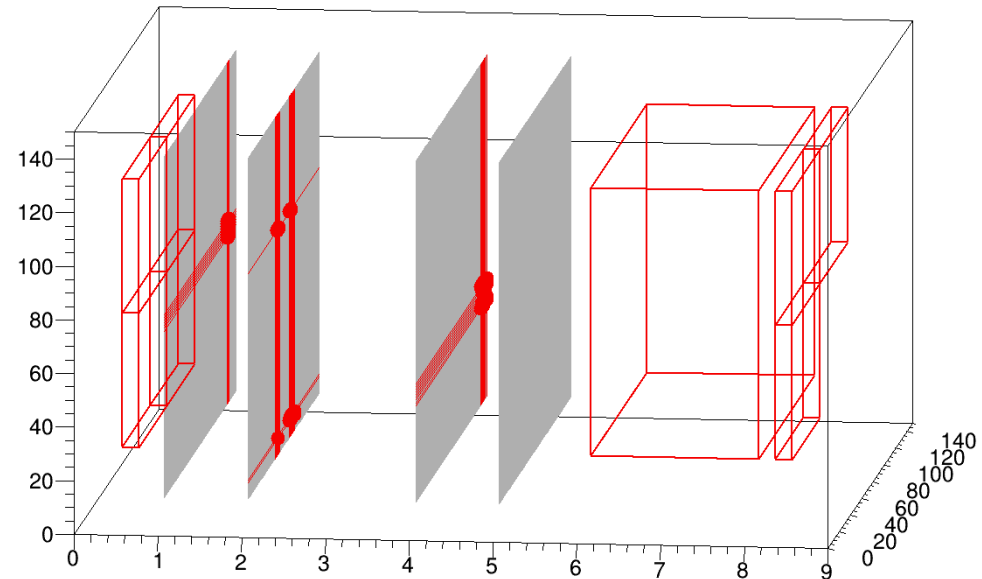

# Test Beam Users

- **MTest**

- Hosted LHCb and ATLAS groups, testing irradiated sensors
- GEM and Micromegas detectors for EIC R&D.
  - First time for the LHCb group, they were very happy!
- All groups has successful beam runs. They plan to return next year.

- **MCenter:**

- NOvA is seeing beam!
- Filling ORC tomorrow
  - About 7-8 days needed
- Electronics attached after filling

# April at the Test Beam

- MTest
  - UCLA Spacordion Tungsten powder calo installation
    - ORC today
    - Testing both EM and H Cal
    - For EIC/sPHENIX
  - CMS Timing also returns this month
    - Working on a more permanent setup for them
- MCenter
  - NOvA hopefully taking beam!
