

Establishing a Community at FNAL

- How to keep people engaged and talking to each other?
 - HS FT physics center (akin to Neutrino Physics Center)?
Newsletters/meetings/seminars?
 - Communication (Slack channel? Mailing lists?)
 - Sharing of expertise and resources
- How to integrate with the rest of working groups at the lab?
(e.g. DM@FNAL)

Accelerator Opportunities at FNAL

- What are the capabilities that can be harnessed on-site today or in the near future?
- Physics cases for PIP-II and PIP-III? Far future?
- Which initiatives are worth pursuing as independent vs “parasitic” efforts?

Advocating for HS FT Physics

- How to advocate for this science case within the collaborations, lab and beyond?
 - Raise awareness about new signatures, e.g. within neutrino experiments
 - PAC, Snowmass, P5, BRN, etc
 - Uniting behind particular efforts/funding opportunities
- Recruitment for these specific physics goals (as opposed to parasitically within larger collaborations)?
- How to achieve these given time/budget constraints?
