

# **Prospecting for New Physics through Flavor, Dark Matter, and Machine Learning**

## **Report of Contributions**

Contribution ID: 0

Type: **not specified**

## **Muon g-2 experiment**

*Monday, March 27, 2023 8:10 AM (25 minutes)*

### **Summary**

**Presenters:** POLLY, Chris (Urbana); POLLY, Chris (Fermilab)

**Session Classification:** Muon g-2

Contribution ID: 1

Type: **not specified**

## **What kind of New Physics for a muon ( $g-2$ ) anomaly?**

*Monday, March 27, 2023 8:35 AM (25 minutes)*

### **Summary**

**Presenter:** PAGÈS, Julie (UZH)

**Session Classification:** Muon  $g-2$

Contribution ID: 2

Type: **not specified**

## **muon g-2 lattice**

*Monday, March 27, 2023 9:00 AM (25 minutes)*

### **Summary**

**Presenters:** NEIL, Ethan; NEIL, Ethan (University of Colorado, Boulder)

**Session Classification:** Muon g-2

Contribution ID: 3

Type: **not specified**

## **BSM in the Neutrino Sector**

*Monday, March 27, 2023 9:45 AM (25 minutes)*

### **Summary**

**Presenter:** MACHADO, Pedro (Fermilab)

**Session Classification:** Neutrinos

Contribution ID: 4

Type: **not specified**

# **Signatures for New Physics in Short-Baseline Liquid Argon Neutrino Experiments**

*Monday, March 27, 2023 4:30 PM (25 minutes)*

## **Summary**

**Presenters:** PALAMARA, Ornella (Fermilab); PALAMARA, Ornella (Fermilab)

**Session Classification:** Neutrinos

Contribution ID: 5

Type: **not specified**

## Machine Learning for Neutrinos

*Monday, March 27, 2023 10:10 AM (25 minutes)*

### Summary

**Presenters:** TERA0, Kazuhiro (SLAC National Accelerator Laboratory); TERA0, Kazuhiro

**Session Classification:** Neutrinos

Contribution ID: 6

Type: **not specified**

## Naturalness In Your Face

*Monday, March 27, 2023 4:55 PM (25 minutes)*

### Summary

**Presenter:** KOREN, Seth (University of Chicago)

**Session Classification:** LHC 1

Contribution ID: 7

Type: **not specified**

## **BSM searches at CMS**

*Monday, March 27, 2023 5:20 PM (25 minutes)*

### **Summary**

**Presenter:** STROBBE, Nadja (University of Minnesota)

**Session Classification:** LHC 1

Contribution ID: 8

Type: **not specified**

## **BSM searches at ATLAS**

*Wednesday, March 29, 2023 11:00 AM (25 minutes)*

### **Summary**

**Presenter:** ALPIGIANI, Cristiano (University of Washington, Seattle)

**Session Classification:** LHC 1

Contribution ID: 9

Type: **not specified**

# Dark Matter Misalignment Through the Higgs Portal

*Monday, March 27, 2023 6:15 PM (25 minutes)*

## Summary

**Presenters:** BATELL, Brian (CERN); BATELL, Brian (Perimeter Institute); BATELL, Brian (University of Pittsburgh)

**Session Classification:** Dark Sectors 1

Contribution ID: **10**

Type: **not specified**

## **FASER and the FPF**

*Monday, March 27, 2023 6:40 PM (25 minutes)*

### **Summary**

**Presenter:** FENG, Jonathan (UC Irvine)

**Session Classification:** Dark Sectors 1

Contribution ID: 11

Type: **not specified**

## Higgs at ATLAS and CMS

*Thursday, March 30, 2023 10:10 AM (25 minutes)*

### Summary

**Presenters:** KONIGSBERG, Jacobo (University of Florida); KONIGSBERG, jacob (univ of florida)

**Session Classification:** LHC 2 + Machine Learning 2

Contribution ID: 12

Type: **not specified**

## **Public Lecture: Casting a Wide Net for Dark Matter**

*Wednesday, March 29, 2023 5:30 PM (1 hour)*

### **Summary**

**Presenter:** TAIT, Tim (UC Irvine)

**Session Classification:** Public Lecture

Contribution ID: 15

Type: **not specified**

## Uncertainties in the era of ML

*Tuesday, March 28, 2023 9:45 AM (25 minutes)*

### Summary

**Presenter:** GHOSH, Aishik

**Session Classification:** Machine Learning 1

Contribution ID: 16

Type: **not specified**

# Machine Learning for Event Generation and Fast Simulation

*Tuesday, March 28, 2023 10:10 AM (25 minutes)*

LHC run 3 has just started and in the years leading up to 2040, we will see a 20-fold increase in available data. This forthcoming dataset will have enormous potential for a deeper understanding of the Standard Model and possible physics beyond it. At the same time, the endless possibilities of new physics hiding in this dataset pose a challenge, both for our analyses and also our simulation algorithms.

Modern machine learning has become a standard tool in our numerical tool box. In recent years, we have not only seen applications to boost the performance of existing algorithms, but also new analysis or simulation strategies. I will highlight how advancements in modern Machine Learning, especially using invertible networks also known as normalizing flows, help speed up crucial bottlenecks in event generation and detector simulation.

## Summary

**Presenter:** KRAUSE, Claudius (ITP Heidelberg)

**Session Classification:** Machine Learning 1

Contribution ID: 17

Type: **not specified**

## Anomaly Detection

*Tuesday, March 28, 2023 10:35 AM (25 minutes)*

### Summary

**Presenter:** MIKUNI, Vinicius Massami (Universitaet Zuerich (CH))

**Session Classification:** Machine Learning 1

Contribution ID: **18**

Type: **not specified**

## Dark Photons

*Thursday, March 30, 2023 5:50 PM (25 minutes)*

### Summary

**Presenter:** LIU, Zhen (University of Minnesota)

**Session Classification:** Dark Sectors 3

Contribution ID: **19**

Type: **not specified**

## **Darkquest**

*Tuesday, March 28, 2023 8:25 AM (25 minutes)*

### **Summary**

**Presenter:** FENG, Yongbin (Fermilab)

**Session Classification:** Dark Sectors 2

Contribution ID: 24

Type: **not specified**

# **Cosmological Considerations for Dark Sectors with Light Mediators**

*Thursday, March 30, 2023 4:30 PM (25 minutes)*

## **Summary**

**Presenter:** SHELTON, Julia (Jessie) (UIUC)

**Session Classification:** Cosmology

Contribution ID: 25

Type: **not specified**

## Particle physics models that predict dark matter in the form of primordial black holes

*Thursday, March 30, 2023 4:55 PM (25 minutes)*

Primordial black hole is a dark matter candidate in a variety of existing models of physics beyond the standard model, including supersymmetry models and models with asymmetric dark matter. I will review the formation of black holes in such scenarios, as well as the effects of predicted PBHs on astrophysics and cosmology.

### Summary

**Presenter:** KUSENKO, Alexander (UCLA)

**Session Classification:** Cosmology

Contribution ID: 27

Type: **not specified**

# Astrophysical searches for particle dark matter using neural simulation-based inference

*Wednesday, March 29, 2023 10:10 AM (25 minutes)*

The complexity of astrophysical data and presence of unknowable systematics poses significant challenges to robustly characterizing signatures of dark matter in many datasets using conventional methods. I will describe how overcoming these challenges will require a qualitative shift in our approach to statistical inference, bringing together several recent advances in probabilistic machine learning, differentiable programming, and simulation-based inference. I will showcase applications of these methods to the analysis of Fermi gamma-ray data, with implications for the Galactic Center Excess, and the analysis of stellar kinematics of stars bound to dwarf galaxies, aiming to uncover the latent dark matter density profiles with implications for the nature of self-interactions in the dark sector.

## Summary

**Presenter:** MISHRA SHARMA, Siddharth (New York University)

**Session Classification:** Dark Matter Indirect Detection

Contribution ID: 28

Type: **not specified**

## Indirect Detection

*Wednesday, March 29, 2023 9:45 AM (25 minutes)*

### Summary

**Presenter:** LEANE, Rebecca (SLAC)

**Session Classification:** Dark Matter Indirect Detection

Contribution ID: 29

Type: **not specified**

## Machine Learning for Particle Astrophysics

*Wednesday, March 29, 2023 10:35 AM (25 minutes)*

### Summary

**Presenter:** BUCKLEY, Matthew (Fermilab)

**Session Classification:** Dark Matter Indirect Detection

Contribution ID: **30**

Type: **not specified**

## **Kaon Theory**

*Thursday, March 30, 2023 8:00 AM (25 minutes)*

### **Summary**

**Presenter:** ZUPAN, Jure (U. Cincinnati)

**Session Classification:** Kaons

Contribution ID: **31**

Type: **not specified**

## **NA62**

*Thursday, March 30, 2023 8:25 AM (25 minutes)*

### **Summary**

**Presenter:** BIINO, Cristina (CERN)

**Session Classification:** Kaons

Contribution ID: 32

Type: **not specified**

## **KOTO**

*Thursday, March 30, 2023 8:50 AM (25 minutes)*

### **Summary**

**Presenter:** WAH, Yau (University of Chicago)

**Session Classification:** Kaons

Contribution ID: 33

Type: **not specified**

## Higgs Theory

*Thursday, March 30, 2023 9:45 AM (25 minutes)*

### Summary

**Presenters:** WAGNER, Carlos (Argonne National Laboratory); WAGNER, Carlos (University of Chicago and Argonne National Laboratory); WAGNER, Carlos (ANL and University of Chicago)

**Session Classification:** LHC 2 + Machine Learning 2

Contribution ID: 35

Type: **not specified**

## Machine Learning at CMS

*Thursday, March 30, 2023 10:35 AM (25 minutes)*

### Summary

**Presenters:** NGADIUBA, Jennifer (FNAL); NGADIUBA, Jennifer (Caltech)

**Session Classification:** LHC 2 + Machine Learning 2

Contribution ID: 36

Type: **not specified**

## Five predictions for the next five years

*Wednesday, March 29, 2023 8:00 AM (25 minutes)*

### Summary

**Presenter:** SORENSEN, Peter (LBL)

**Session Classification:** Dark Matter Direct Detection

Contribution ID: 37

Type: **not specified**

## **Sensors for DM Detection at the meV Scale**

*Wednesday, March 29, 2023 8:25 AM (25 minutes)*

### **Summary**

**Presenter:** KURINSKY, Noah

**Session Classification:** Dark Matter Direct Detection

Contribution ID: 38

Type: **not specified**

## **Seeing the invisible: the search for low-mass axion dark matter**

*Wednesday, March 29, 2023 8:50 AM (25 minutes)*

### **Summary**

**Presenters:** SALEMI, Chiara (MIT); SALEMI, Chiara (UNC Chapel Hill)

**Session Classification:** Dark Matter Direct Detection

Contribution ID: 39

Type: **not specified**

## Dark Sector Theory

*Tuesday, March 28, 2023 8:00 AM (25 minutes)*

### Summary

**Presenter:** POSPELOV, Maxim (University of Minnesota)

**Session Classification:** Dark Sectors 2

Contribution ID: 40

Type: **not specified**

## Dark Sectors at Belle II

*Thursday, March 30, 2023 6:15 PM (25 minutes)*

### Summary

**Presenter:** TORASSA, Ezio

**Session Classification:** Dark Sectors 3

Contribution ID: 41

Type: **not specified**

## Dark Sectors at LHCb

*Thursday, March 30, 2023 6:40 PM (25 minutes)*

### Summary

**Presenter:** DELANEY, Blaise (Cambridge)

**Session Classification:** Dark Sectors 3

Contribution ID: 42

Type: **not specified**

## **Heavy Flavors at Belle II: Prospecting for New Physics with b & c quarks and tau leptons**

*Friday, March 31, 2023 8:00 AM (25 minutes)*

### **Summary**

**Presenter:** RONEY, Michael (University of Victoria)

**Session Classification:** Heavy Flavor Physics 2

Contribution ID: 43

Type: **not specified**

## **Long-Lived Particles Decaying to the Third Generation (and a far-future look)**

*Friday, March 31, 2023 9:45 AM (25 minutes)*

### **Summary**

**Presenter:** FARRINGTON, Sinead

**Session Classification:** LHC 3 + Snowmass

Contribution ID: 44

Type: **not specified**

## Machine Learning at LHCb

*Friday, March 31, 2023 8:25 AM (25 minutes)*

## **Machine Learning for Triggering**

*Tuesday, March 28, 2023 11:00 AM (25 minutes)*

**Presenter:** DUARTE, Javier (University of California San Diego)

**Session Classification:** Machine Learning 1

Contribution ID: **63**

Type: **not specified**

## **ALP theory**

*Tuesday, March 28, 2023 4:30 PM (25 minutes)*

**Presenter:** DROR, Jeff (UC Santa Cruz)

**Session Classification:** Axion Like Particles

Contribution ID: 64

Type: **not specified**

## Hybrid Cosmological Collider of Axion

*Tuesday, March 28, 2023 4:55 PM (25 minutes)*

If a light axion is present during inflation and becomes part of dark matter afterwards, its quantum fluctuations contribute to dark matter isocurvature. In this article, we introduce a whole new suite of cosmological observables for axion isocurvature, which could help test the presence of axions, as well as its coupling to the inflaton and other heavy spectator fields during inflation such as the radial mode of the Peccei-Quinn field. They include correlated clock signals in the curvature and isocurvature spectra, and mixed cosmological-collider non-Gaussianities involving both curvature and isocurvature fluctuations with shapes and running unconstrained by the current data. Taking into account of the existing strong constraints on axion isocurvature fluctuations from the CMB, these novel signals could still be sizable and potentially observable. In some models, the signals, if observed, could even help us significantly narrow down the range of the inflationary Hubble scale, a crucial parameter difficult to be determined in general, independent of the tensor mode.

**Presenter:** LI, Lingfeng (Brown U.)

**Session Classification:** Axion Like Particles

Contribution ID: 65
